

R A D I O T E L E X

The final issue.

(64)

January 2 , 1986

Dear fellow-Free Radio enthusiasts,

it's certainly not easy for me to write this final issue of RADIOTELEX, that's for sure. It has always been a job with lots of ups and downs in the nearly two and a half years of existence or, with other words, I was not so sure two or three times to keep this work up as long as I have anything to do with "Free Radio" (a term which I, by the way, always wrote -and still write- with major initials), that is: being interested for almost eight or nine years in Free Radio.

Before I started RADIOTELEX, I have written the tropical bands section as well as a Free Radio section for a local club's magazine, so I was not new to the massive work that I was going to run into when I definitely started RADIOTELEX.

May I take this last opportunity to thank certain people for their invaluable help in the past and present - well, it really is a pity that the "newcomers" who subscribed to TELEX recently now won't have any regular help from this side. I know myself that it sometimes is a feeling of being left standing alone in the rain when you're absolutely new to the hobby- not to talk of the same feeling when you didn't see any response from the people you are writing for...

But that would be too easy, to claim that these people are the main reason for stopping RADIOTELEX now, I would like to put it this way : It cannot be expected from a single person to be motivated exactly every 14 days for the same kind of work (he has to do, beneath his job, often until late in the night).

On the other hand: I knew this. And I also know that now the time has come to stop it. It would have been stopped anyway in the near future due to other commitments. So, please, understand my decision and also accept it. Thanks a lot.

Here are the services that are left open for the time being, as long as it will be possible :

THE ADDRESS SERVICE IS STILL OPEN FOR THE STATIONS USING IT NOW. NO PLANS ARE MADE TO CLOSE THIS ADDRESS.

THE SAE-SERVICE WILL BE OPEN AS LONG AS THERE IS ANY NEED FOR IT. IN OTHER WORDS : IN CASE YOU ARE INTERESTED.

YOU (EVERYONE) CAN OF COURSE WRITE IN WITH ANY QUESTION CONCERNING FREE RADIO THAT I WILL TRY TO ANSWER AS GOOD AS I CAN.

THE TELEPHONE SERVICE IS CLOSED DUE TO LACK OF RESPONSE FROM THE LISTENERS. SORRY TO SAY THAT.

Oh yes, please try to put only the P.O.BOX and city/ country on the envelope when writing in to a station or to us. Perhaps it will be better to mark the station's initials in the top left hand corner of the envelope, see sample underneath :

Paul Davidson

Well, that's a short log-list but I can't help it.

NEWS

R. Caroline (offshore) is going to broadcast on shortwave, according to Media Network of R. Nederland. They already made or will make a test-transmission on 6273 kHz with 500 W, an old army transmitter is aboard, relay of their usual progs from the mediumwave should start in February 1986.

R. Limit International is a new name planning to go to the air via Delmare soon. They will use P.O. Box 750 925, 2820 Bremen 70, FRG.

Bye for now and take it easy, I try to do so as well.

P.S.: Outstanding subscription-money will be returned soon, of course.

73 and good-bye, it's not for ever....

Radiofelex

RADIOTELEX - SHORTWAVE FREE RADIO NEWSSHEET - Issue 65 / Volume 3

NEW ADDRESS: RT, c/o Duempter Strasse 6, D-4100 Duisburg 12, FRG.

"It's not for ever..."

January 14th, 1986 (Tuesday)

Well, it seems eternity only lasts a bit less than a fortnight because here we are back again ! Following a few quick decisions made lately it was decided to give it a try again and re-start RT with slightly changed editorial staff. This, of course, means that there are some very important changes such as our editorial address given above. Unfortunately, we also had to drop a fourth page of the mag for the time being but even though there is a slight increase in subscriptions' prices. From now on a year's sub of RT costs in West Germany 30DM (sent as a letter) or 22DM (sent as a printed matter), United Kingdom £10.00, Eire £10.00, France FF90, Netherlands hfl35, Sweden skr130, Finland Fmk90, Switzerland SF25 and finally Italy 20300Lit. Our Dutch and Swedish readers will get an extra-issue to make up for the increased costs.

We are really sorry for this price rise but we now have to pay for getting RT copied which wasn't the case in the past. Anyway, hope it's still worth reading this little mag... by the way, current subs will continue though some readers may experience a shortage in issues sent for the money some time ago. If you want to find out when your sub is about to end, have a look at the envelope you received this in where you can find a certain number (no, not the zip-code), e.g. 77 which means RT 77 is the last issue you get for your sub. In case you find a "*" on the envelope your sub has run out and you ought to send some money should you wish to obtain further copies of RT.

Two more things to talk about: as printed in RT 64 the SAE-service as well as the stations' maildrop continue through good old PO Box 750925, D-2820 Bremen 70, West Germany. Please send any mail concerning the mag to the new address only. Oh yes, we would like to point out that we have NOTHING to do with the "Clandestine Listeners Club Germany" which coincidentally has its headquarters in the same town.

What an awfully long editorial ! Let's start with the LOGBOOK at last :

Not a bad start of the new year as far as the amount of loggings are concerned; followed by a whole lot of news items that poured into our office(s)...

Radio Apollo International (c/o Bremen & Hunstanton) returned with a number of broadcasts over the holiday season, both using own tx facilities and relays in the UK and on the continent. RAI plans to do another so-called co-site broadcast from Wales in co-operation with Radio 48.

Radio Aquarius Int, Postbus 628, 3100 AP Schiedam, Holland, is said to continue testing every 1st Sunday of the month 0600-0700UTC. 7375kHz was used in December and there is a chance that a 6MHz-channel will be used the next time they are on (just in case anyone is listening out at such a terribly early morning hour).

NEWS (contd)

Radio C we mentioned in RT 63 was logged in West Germany recently on their relatively new outlet on 9810kHz. Address: Radio C, Medienwerbegesellschaft mbH, Grundstrasse 31, D-8452 Hirschau, West Germany.

On December 29th, 1985 Radio Delmare announced the following programme schedule valid until April this year: 1st Sunday of the month - Radios Diamond, Scorpio and Rastafari; 2nd Sun - Radios Marabu, Tutenchamun & Privat; 3rd Sun - FRS-Holland; 4th Sun - Radio CLCG. In addition there shall be transmissions on Saturday (Sound of Sweden-relays and Delmare's own programming). However, we missed a signal on 6207 in January so far.

Radio Diamond now uses the following mailing address: c/o PO Box 220342, D-5600 Wuppertal 22, West Germany. The station is also active as a QSO-station (e.g. under the name Radio Tango Nov 24th, 1985) on 48 metres using a commercial Lorenz-tx of 25/100 watts power. Regular relay shows via Delmare (see above) are also lined up for the near future.

KLA-Radio returned to the airwaves December 29th, 1985 on 6320kHz with a show hosted by Brett Sinclair. On New Year's Day Gerry Sinclair was heard with a programme for "KLA B.M. Broadcasting" (again on 6320kHz) where he announced the address B.M. Broadcasting, London WC1N 3XX, UK; KLA and Spectrum co-operate nowadays (any further info welcome)?

Radio Ministry International was the tentative name of a new station logged in West Germany January 12th on 6316kHz with very poor signals. PO Box 101, Sheffield, England is the address for this one.

Radio Privat, Turmstrasse 26, D-6500 Mainz, West Germany, got about 40 letters for their debut broadcast last year via Delmare. All the mail will be answered as soon as the new promo-stickers, the reason for any delay, are ready. Privat is scheduled to come on every 2nd Sun on 6207.

Rainbow Radio, Postbus 725, Arnhem, Holland, did a brief test transmission in the afternoon of New Year's Eve with very low power on 6555 kHz (!), unfortunately only audible locally "down there". The station still intends to broadcast on medium wave over own gear following a 66-minute-relay over a Dutch station December 22nd, 1985 on 1615kHz.

Radio Rainbow International, the Irish one this time, has introduced the following schedule beginning January 5th: 1000UTC Jim Agnew with charts sounds, 1100UTC FRC-Ireland show, 1200UTC Heady Eddie's "Going-back-in-time-show", 1300UTC c/d. Additionally, tapes of the Four Freedoms World Service (Das gibt es nur in Texas !) are still aired.

UK-Radio can be contacted at PO Box 5, Hunstanton, Norfolk, England.

Radio Waves Int'l, BP 130, Rueil-Malmaison, France, returned lately with their old 18W-valve-rig being repaired in late 85 and is looking for a clear channel. RWI also wants to come up on MW soon and welcomes schedules/diagrammes of transistorized txs at the above address.

Radio 22 (Twenty-Two) is a new station that first popped up via the IRRS January 12th for 45 minutes. Interestingly, the DJ Don Michael requested a 1-US-dollar note as return postage (IRCS do cost a fortune here in West Germany nowadays); address: Postbus 725, Arnhem, Netherlands.

And finally Wavelength magazine has organized a pop poll on free radio in 1985; send your Top-5 votes for the following subjects: best SW stn, best MW/FM stn, best audio-SW, best audio-MW, best audio-FM, best QSL-card, best DJ and best magazine by January 23rd (hurry up !) to WL, PO Box 5, Hunstanton, Norfolk PE36 5AU, England. By the way, a sample copy costs 50p or 3IRCS (very recommendable), available from that well-known address.

73s & don't forget: in 14 days we are two weeks further (deadline for RT 66 is January 28th, 1985)... until then FFRN from Radiotelex

RADIOTELEX - SHORTWAVE FREE RADIO NEWSHEET - Issue 66 / Vol. 3

R.T., c/o Duempter Strasse 6, D-4100 Duisburg 12, West Germany.

January 28th, 1986 (Tuesday)

Hello to you all

and welcome back once again to RT 66. Lots of stuff to report but before we start there are a couple of things to say: apologies first for the poor printing of RT 65; that was indeed an exception from the rule and we hope to get future issues of Telex out with a slightly improved copying standard. A new promo spot is now available and will be sent to several stations within the next weeks; you may also send a blank tape to our address if you wish to speed things up.

A rather full LOGBOOK in spite of really bad conditons on the bands :

Updater --- Jan 1st, 1986 6304kHz 1224UTC was now IDed as Radio
Ridiculous from the Netherlands
Jan 12th 6240kHz UNID playing nonstop country music
0902UTC heard in Sweden with S=2
6275kHz Radio King, E/Swe, test, 0941UTC,
heard in Sweden with S=3/4

At last, the NEWS

Canzoni Radio, c/o PO Box 750925, D-2820 Bremen 70, West Germany,
intends to broadcast regularly once a month via FMTR on 6319kHz.

Radio CLCG, c/o PO Box 540101, D-4100 Duisburg
11, West Germany, is conducting a pop poll on
their programmes and free radio in general;
forms can be obtained from the above address
(not ours !). New QSL-cards & other promo
stuff is also available now.

For the biggest selection of
free radio merchandise, incl.
"Weekly Report" and medium
wave frame aerials...contact
"ANORAKS U.K.", P.O. BOX 539,
BLACKPOOL, FY1 4RE, ENGLAND.

NEWS (contd)

Radio Delmare, PB 36, 2050 Antwerp, Belgium, is off the air at the moment for security reasons (rumours tell a police helicopter has flown over Delmare's permanent site..) silencing quite a lot of the stations that are relayed on 6207kHz.

Falcon Radio, c/o IRRS, PO Box 1686, Dublin 1, Eire, announced that new QSL-cards are now available. The station will be celebrating its 1st anniversary in early February with a special fact-sheet on how Falcon started in 1985 and probably some extra-ordinary broadcasts.

Flash-1610, Pb 760, Maastricht, NL, which planned an appearance on 48 metres in January 86 has to postpone their debut on the airwaves up till a yet unknown date.

The "Free Radio Listeners Club" (PO Box 99, Northhampton -sorry, one "h" too much- in England) invites you to join that new club for £ 8.00 cash or money order; in return you will receive 50 FRL personalized QSL-cards, stickers, ID card, labels, info-sheets, magazines and so on. For more info and samples send either 2 UK stamps or 2 IRCs to their address (and mention you read about it in Radiotelex).

Gravestone Radio, PB 725, Arnhem/NL, is a new station to be relayed by the IRRS on 48 metres very soon. Apart from playing music, Gravestone also wants to include critical commentary or anything of humour and interest in their programmes; future transmissions over an own rig are also planned for which tx schedules for SW and/or MW are needed.

Radio King is a new Swedish station currently testing on the 48mb; they can be contacted at Postbus 41, 7700 AA Dedemsvaart, Holland.

KIWI Radio, PO Box 1437, Hastings, New Zealand, has been to court on January 23rd. The station has informed us that they will plead not guilty; meanwhile KIWI has returned and can be heard throughout the South Pacific on 5850kHz 0400-0900 and on 7340kHz 1900-2300UTC on Saturdays and Sundays. In addition the station uses 1575kHz & 89MHz.

Radio Marabu International (c/o Bremen) is scheduled for relay in the USA on February 14th on approx. 7425kHz around 0200UTC.

Marconi Radio Int'l is a new Italian station testing with 25 watts on 11570kHz Sat 1230-1630UTC and Sun 1030-1430UTC. / Media Network

Radio Pamela seems to use 3 Rosewarne Cotts, Rosewarne Downs, near Camborne, Cornwall TR14 OBE, UK at present (this is not 100% sure) and can be logged on 6299kHz with fair signals and very low mode.

The Voice of Peace is now transmitting on 1530kHz (ex-1539/1540).

PFBS ("The Pirate Freaks QSO Station") intends to do a competition over the coming weekends: one question will be broadcast in each PFBS programme and everyone answering that question correctly and sending a report will enter. Caroline Top-500 and Laser posters are to be raffled off. You can contact PFBS at the well-known Bremen maildrop.

The Sophisticated Radio System plans to test next Sunday (Feb. 2nd) on 5300 or 5310kHz; music by Andreas Vollenweider -spelling correct?- will be played at around 0900, 1000, 1100 or 1200UTC (on top of the hour, you see). Address: c/o Dedemsvaart.

Radio Universum, c/o Bremen, has its next broadcast February 2nd at 1100UTC. RU hopes to transmit every 1st Sunday of the month now.

Radio 101's 7350-outlet is out of service at the moment due to technical problems; it is not known when 101 will return on shortwave but it is supposed to be not earlier than mid-February.

What else could we add but thanks for reading. RT 67's deadline is February 11th - until then FFR

RADIOTELEX - SHORTWAVE FREE RADIO NEWSSHEET - Issue 67 / Vol. 3

R.T., c/o Duempter Strasse 6, D-4100 Duisburg 12, West Germany.

February 11th, 1986 (Tuesday)

It can hardly get worse...

... seems to be the proper headline of this edition of Radiotelex as there is a lot of bad news we have to tell you this time.

For the biggest selection of free radio merchandise, incl. "Weekly Report" and medium wave frame aerials...contact "ANORAKS U.K.", P.O. BOX 539, BLACKPOOL, FY1 4RE, ENGLAND.

First of all, PO Box 750925 at D-2820 Bremen 70, FRG, will close down by March 1st, 1986; in other words various stations will be left without a mailing address next month. Anyway, we would like to point out that this measurement has to be taken due to continued problems with the postal authorities.

Fortunately, we have received word from PIN-Magazine that stations which are looking for a new maildrop may write to Postfach 220342, D-5600 Wuppertal 22, West Germany along with return postage if they require information on that matter.

Further alternatives are the following addresses in the Netherlands, so if you need a mailbox for your station why not drop them a line: 1) Postbus 41, 7700 AA Dedemsvaart, NL; 2) Postbus 725, Arnhem, NL and 3) Postbus 19074, 3501 DB Utrecht, NL. All these three addresses are used by a number of stations at present and are known as being reliable.

From March 1st, 1986 onwards the SAE-service will continue through the Duisburg address. By the way, it must be pointed out that this address (Duempter Strasse etc.) is not available as a maildrop for free radio stations; please save your money and don't enquire here !

Extraordinarily bad conditons on the bands were noted last weekend where the lowest number of stations for ages were logged. Apparently, this has something to do with a huge increase in solar activity as Radio Netherlands' Media Network programme reported on February 6th. We can assure you that it wasn't your receiver that was out of order last Sunday in case you only heard a lot of noise on 48 metres apart from the ever strong voice of Vatican Radio...

Finally in this introduction section here is a hint for those of you who are eager to tune in to something special: watch out on Sundays around 6555kHz (but not for the Voice of Lebanon fools).

And there we are in our rather brief LOGBOOK (Times are GMT/UTC) :

February 1st, 1986 (Saturday)

S-rate: UK -CON-SCA-

6310	R.Ireland Int	1115	E	- 2 -
7295	R.Earth via Milano			

Not much really. Perhaps we should have a look into the QSL-CORNER for a change :

+ station	+ freq	+ days	+ sent	+ received items
Radio Arena	6240	30	?	QSL-card, letter, poster
Satellite BC Company	7400	29	?	QSL-card, letter
R.Tutenchamun	7295	18	?	QSL-card, letter, info
Boyneside Radio	1305	10	?	form letter, postcard
KLA B.M.Broadcasting	6320	25	SAE	QSL-card, 3 Spectrum-World BC-pennants (!)
Weekend Music Radio	6295	18	SAE	2 QSL-sheets, letter
Sounds Alternative	6240	30	SAE	info-booklet incl QSL
Pirate Freaks BC Sce	6221	30	RP	QSL-card, letter
R.Enterprise/NL	6264	10	IRC	QSL-card, letter
Free Medway Town R.	6340	12	2IRCS	QSL-letter

Due to the low activity on the bands recently there isn't much to report this time but never mind. The NEWS :

Radio Apollo International, PO Box 5, Hunstanton, Norfolk PE36 5AU, England and until March 1st also c/o Bremen, will be relayed by a Dutch outlet next Saturday night on February 15th, 1986. Check up with 1615kHz before you go to bed that night ! Unless new QSL-cards have arrived by now correct reports will be verified probably with a photo of the RAI studio, so write in, won't you ?

Radio Asteroid have been making tests on 10290kHz, the last one 1600-1800UTC on Saturday, January 18th and they intend to continue. Those tests are unlikely to be audible in the UK due to the high frequency used but may be heard in Europe. No address has been announced yet.

Radio Delmare (Box 36, 2050 Antwerp, Belgium) is off the air at the moment because of technical problems. So we were told. It may seem to be clever to link that with the piece of info saying that lately five stations have enquired at the IRRS (PO Box 1686, Dublin 1, Eire) for relays in the not too distant future...should bring to light further developments soon.

Free Medway Town Radio, PO Box SH9, Sherness, ME12 1AQ, England has had severe problems in keeping their schedule due to the heavy storms along the coast of SE-England (even the Ross Revenge ran into trouble). During the first weekend of February the aerial decided to fall down which silenced FMTR on Saturday, Febr. 1st but the staff managed to put out an abbreviated schedule the following Sunday. Amazingly, the station wasn't logged ever since, probably thanks to the poor condition

US-pirate station K.B.B.R. was relayed recently over Radio Milano's 7295kHz-outlet with something many people wouldn't call a programme. PO Box 982, Battle Creek, Michigan 49016, USA was announced and don't forget to enclose 3 IRCs or 3 22ct stamps for an "outlawed QSL".

An item that should have appeared in RT 66 already is that PIN-Magazine issue 19 is out now with a completely new look and contains 36 pages of info on pirate and private radio on FM/MW/SW, offshore etc, all in German. A sample copy is available for DM 3,- in mint stamps of small values in West Germany, from abroad send US-\$ 2.00 or £ 1.00 or 3 IRCs. Address: Postfach 220342, D-5600 Wuppertal 22, West Germany.

The Pirate Freaks Broadcasting Service (PFBS) might be using Postbus 41 at 7700 AA Dedemsvaart/NL from now on instead of the Bremen maildrop which as we all have learnt on page-1- is forced to stop its activities

Radio Rainbow International, Hedy Eddie, 151 More money...sorry, it's of course 151 Moneymore, Drogheda, Co.Louth, Eire, is reported to issue new QSL-cards soon. They are still on every Sunday on 6240kHz.

Rainbow Radio from Germany (in spite of their Dutch address: Postbus 725, Arnhem/NL) intends to be relayed shortly over Radio Ireland International on 6310kHz.

The Sophisticated Radio System (c/o Dedemsvaart) wasn't on the air on February 2nd as planned due to the fact that the operator was struck down by the (Siberian ?) flu. However, new tests should go out on 60 metres soon; carry on checking 5300 and 5310kHz on Sunday mornings !

Radio Torenvalk, Postbus 36, 7010 AA Gaanderen/NL, had their first ever shortwave transmission via Radio Tonair February 2nd on 48 metres (as usual drifting all over the place). Torenvalk is also active over own equipment (500-watt-tx) on 1094kHz and announced to transmit there on the first Saturday night/Sunday morning of each month starting after midnight UTC. Meanwhile, Radio Tonair, Pb 21, 7010 AA Gaanderen/NL has announced that stations interested in a relay over their tx should drop them a line.

WLS Music Radio International from Galway (Eire) is currently erecting new aerials including one for short wave (!) according to AUK's excellent "Weekly Report". Any further news available ?

In brief: the Voice of Peace logged on 2nd harmonic of 1530kHz (=3060kHz) at 0230UTC / R.Penfold mentioned in RT65 seems to be identical with a Radio London that appeared in January 84 on 48mb.

-do you ? See ya again February 25th, until then.

I ♥[®]
101

RADIOTELEX - SHORTWAVE FREE RADIO NEWSSHEET - Issue 68 / Vol. 3

R.T., c/o Duempter Strasse 6, D-4100 Duisburg 12, West Germany.

February 25th, 1986

Welcome back again to Radiotelex

and following the (how someone described it) horror issue last time we are glad to say that in general things are presently improving.

However, let's start with the sad news that the old RT-address and maildrop of many free radio stations at Bremen is entirely closed by now. Any mail sent to that PO Box will be returned, so don't waste your money ... by the way, we would be grateful if as many magazines or DX-programmes as possible would relay that piece of info in order to avoid delays and unnecessary costs. Thank you very much.

Just to remind you: the SAE-service continues through the Duisburg address. We shall be contacting everyone who has inquired about that service very soon.

So folks, here's the latest chapter from our LOGBOOK :

February 15th, 1986 (Saturday)

S-rate: UK -CON-

The NEWS is next...

Letters sent to Radio Atlantis Int'l which popped up twice in December 1984 on 41mts have recently been returned from Dedemsvaart stating the station is unknown there.

Radio Epsilon is the name of a station that appeared February 9th on 6240kHz via the Dutch Radio Tonair's tx (not via PFBS as rumours say). The address for that is c/o 3 Rosewarne Cottages, Rosewarne Downs, near Camborne, Cornwall, TR14 OBE, UK (can't be longer, can it?).

Europe Radio International is likely to hit the airwaves next Sunday March 2nd on 6300 or 6310kHz after 1200UTC; this, incidentally, will be a joint broadcast (possibly live) by the Pirate Freaks Broadcasting Service and Canzoni Radio from Germany. Special QSLs should be available from PO Box 1225, D-4534 Datteln, West Germany. Please note that from now on Canzoni can be contacted through that address as well.

Radio Jessica, c/o Dedemsvaart, was heard quite often last weekend on 7350kHz, apparently via Radio 101. Nevertheless, "engineering test transmissions" were mentioned in the jingles, so what's to follow next?

++ Hot News: R.Limit Int now uses Wuppertal-addr + soon to be relayed
by Milano 7295 ++

NEWS contd:

Radio King is a rather new station from Sweden which has been testing with their own 10-watt-rig on 6265 or 6275kHz. The station that has in fact broadcast five times already offers a QSL-card and letter; their next txmsn, by the way, shall be on Easter Sunday on 48 metres. Address: c/o Postbus 41, 7700 AA Dedemsvaart, Netherlands.

We now have an address for Marconi Radio Int'l: Via Gozano 8, Bologna, Italy. Besides, we have also received an info that the station has changed its frequency now to 11960kHz (formerly on 11570kHz with 25W).

Radio Orang Utan ("the monkey of the Netherlands") intends to stay on 1508kHz for the time being. According to OP Freddie there shall be three broadcasts next month: on March 2nd, 23rd & 30th after 0000UTC. Isn't that sticker a bit premature, eh ?

Radio Orion is currently testing daily. (!!) on 6240kHz (weekdays) and 6265kHz (Sundays). The station has been observed February 20th and transmits 1000-1200UTC and even in the afternoon after some kind of lunch break. Address: c/o M13, Shearbridge Green, Bradford, West Yorkshire BD7 1HW, England.

Radio Pamela has cooked their gear lately which is why they are off the air for the moment. You can contact the station via 3 Rosewarne Downs (see Epsilon-item) or c/o KIWI Radio in New Zealand. Good grief !

Pelsjager Radio, an old station which used to broadcast on 227mts a long time ago has returned on 1508kHz; their current address is: Postbus 454, 6000 Doetinchem, Holland.

Radio Tutenchamun, now c/o Wuppertal/FRG, plans to broadcast via Radio Milano Int'l on 1301 & 7295kHz each Saturday 0900-1000UTC beginning in mid-March. All relays over Delmare will be dropped; however, RTUT's January broadcast may still be put out in case Delmare returns. In addition, questionnaires are presently mailed to listeners to get a clearer picture of opinion concerning their programmes.

Radio Universum, also c/o Wuppertal, intends to test in the new 57/58 metre band within the next few months. Furthermore, new QSL-cards and info-material are under printing at the moment.

Finally, let's get a bit commercial again :

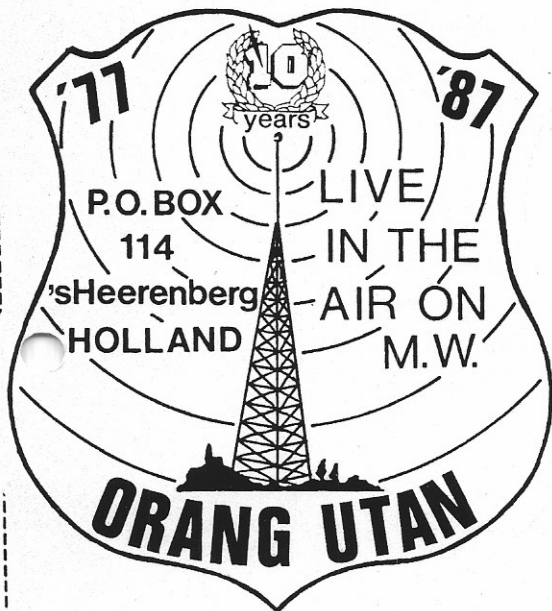

The Free Radio Rendevu (TFRR) is (like RT) a fortnightly newsletter and includes news and logs from SW & MW 180mts plus features. For one issue (two A4 photoreduced sheets/pages) send 40p for the UK or 1 US-dollar from Europe to TFRR, c/o Pengarth, Penance Lane, Lanner, Redruth, Cornwall TR16 5TW, UK. You may also phone in at (0209) 217637 in the UK.

Also out now are Wavelength issue 8 (featuring a very interesting pop poll; thanks a lot to all who voted for RT, of course !) for 50p or 3 IRCs at PO Box 5, Hunstanton, Norfolk PE36 5AU, UK. And talking of that poll here are a few results: Best SW station 1) FRSH, 2) Atlanta, 3) R.Rainbow Int, 4) BRI and 5) Apollo; best mag 1) Monitor, 2) RT, 3) Weekly Report, 4) Free Radio Waves and 5) PIN-Magazine. Full details in WL 8.

RT 69 shall be hammered on the type-writer again on March 11th, 1986. Until then 73s & take care

RADIOTELEX - SHORTWAVE FREE RADIO NEWSHEET - Issue 69 / Vol. 3
=====

R.T., c/o Duempter Strasse 6, D-4100 Duisburg 12, West Germany.

March 11th, 1986

Hi to you all,

RT is back again on your desk after two weeks of continuously increasing activities on the bands. Thanks a lot to everyone who has sent in logs and news to this edition, especially our long distance reporters for their great help.

It seems to be a good idea to mention RT's current subscription rates which presently are not printed in each issue of this newsheet for some reason: a year's sub costs DM 22 (printed matter) or DM 30 (normal letter) in West Germany, £ 10 in the UK, 35hfl in Holland and skr 130 for our Swedish readers. This includes 26 issues that should more or less look just like the one you've got in front of yourself. Single copies can be obtained by sending 1 IRC or 1.20DM in mint German stamps to the above address.

Two very important remarks to finish off this editorial: please write the abbreviation "RT" on the envelope and don't forget the c/o-sign ! If you send cheques then make sure they are left blank on the payable-line, we might have to return those (in some cases) where "Radiotelex" is put in there, so please don't do it and send us blank cheques.

This issue is supposed to be quite a mess with almost too much info arriving here but to get a start at last here's the LOGBOOK :

Who says nothing's going on these days ? Well, before we waste any more space it's time for the Radiotelex NEWS :

Radio Atlantis SW, c/o PO Box 5, Hunstanton, Norfolk, PE36 5AU, UK, plans to be on again over Easter, probably on 6270kHz. This station is also quite active on FM locally to the South-East of England.

Radio Caroline offshore hopes to commence their SW-service in April 86 after some problems have been experienced due to the bad weather. A 5-kW-tx shall be installed for this purpose; a 1-kW-unit is already on board the Ross Revenge (tests noted some weeks back) which will be a stand-by rig. Address: New York, N.Y. 11518, USA.

Radio CLCG, c/o PO Box 540101, D-4100 Duisburg 11, West Germany (omit the word "radio" when writing in please) plans to have the "CLCG International" show hosted by Steve Young aired next Sunday March 16th via R.Rainbow Int'l on 6240kHz. The 1-hour-programme shall begin at 0900.

Radio Delta (Pb 65, 7260 AB Ruurlo, NL) plans to move to either 1094 or 1508kHz according to the station's operator Gertie. This step shall be undertaken thanks to the 180mtr polka pirates causing deliberate interference. Delta is known for playing lots of golden oldies on/air.

Radio East Coast Commercial, c/o Hunstanton, indicates a change to 26 metres (11584kHz perhaps) soon. It is not known whether this will be a replacement for or an addition to their 48mb channel. RECC hasn't been heard on 41 metres of late; they normally appear each 1st Sunday in a month.

Some slightly commercial bits and pieces are next:
The Free Radio Listeners Club (FRLC) has started off by now if we believe the info passed on to us. The club's offers are actually too numerous to mention all in detail but what we may state is the fact that you can join the FRLC by sending £ 5.00 from the UK or £ 8.00 in the rest of Europe to PO Box 99, Northampton, England. DXers from behind the iron curtain may join for free, we understand, which to us sounds good indeed. Further info is available for return postage.

Free Radio Waves issue 4 is out now and brilliant as ever with many in-depth articles and features on free and commercial radio (wherever the difference lies). You can obtain your copy by sending 80p or 5IRC to Flagstones, West Heath Lane, Sevenoaks, Kent, TN13 1TA, England.

Radio Heideroosje (what a name !) plans to be on 1508kHz again March 30th after midnight UTC. Address: Pb 26, 7030 AA Wehl, Holland.

It appears that the IRRS, PO Box 1686, Dublin 1, Eire, is not willing to put out any more programmes of John England's Four Freedoms/Rebel Radio stations as he hardly replies to listeners' mail.

Radio Joystick, c/o KFWF, Postfach 220342, D-5600 Wuppertal 22, FRG, has informed us that Dieter, Michael and Pete of Radio CLCG-fame have joined the station to present two hours each fortnight. Until June 86 RJ shall be relayed by Milano 7295kHz for 2 hrs per week; afterwards the station attempts to transmit for 4 hrs every weekend !

Radio Marabu, c/o Wuppertal, hopes to be relayed by Milano very soon; in fact, they plan to have a special punk music show on that occasion. RMI may also pop up again over Easter; by the way, new QSL-cards and special badges can be ordered for DM 2.50/2IRCS/1 US-dollar now.

Marconi Radio, Via Gozzano 8, 40127 Bologna, Italy, has apparently settled on 11650kHz; DX-progrs in Italian are sometimes heard !

The address of Radio Newspaperman Int'l which transmits every Friday/Saturday night on 180mts is: Pb 178, 7240 AB (or AD) Lochem, Holland.

Watch out for Radio Orang Utan, Pb 114, 'sHeerenberg/NL celebrating one year on 1508kHz March 23rd with a special transmission !

Just in case you've got too much money, here are some phone numbers you may like to have at hand on a Sunday morning :

Radio Orion ... UK/021/3542168; Crystal Radio ... UK/021/5614897;
Four Freedoms WS (telephone answering machine) ... USA/817/5880941.
Please only phone in when you hear these numbers announced on the air!

The Pirate Freaks Broadcasting Service has been testing a new rig for mobile broadcasts; they intend to do a marathon transmission lasting 4-6 hrs next Sunday March 16th on 6232, 6280, 6293 or 6315kHz from a Belgian site (sounds encouraging). PFBS now uses 32 Victoria Road, Salisbury, Wiltshire, SP1 3NG, UK and will probably be contactable (what a term !) via Dedemsvaart though this may not be 100% sure as yet

Radio Torenvalk, Pb 36, 7010 AA Gaanderen/NL has left 1094kHz after some troubles with BBC Radio 1's carrier on 1089. The station plans to be on again on 1508kHz March 16th; for the future broadcasts on 1004, 1100, 1209 or 1562kHz are considered and so are more SW transmissions.

WLS Music Radio, 24 Prospect Hill, Galway, Eire, claims to have tested on 6240kHz February 14th and announced a real SW service with 200W ! Anyone heard anything, we wonder ? Reports can be sent to the above address at the attention of Richie O'Shea, QSLs are promised. (AUK)

Radio 22 from West Germany can now be contacted at Postbus 19074, 3501 DB Utrecht, Holland. They briefly appeared in January over IRRS.

And to finish off this fortnight's nightshift, deadline for RT 70 is March 25th, 1986 when we rapidly approach Easter this year. Apologies if this edition looks somehow strange to you but things never work out the way they should. Until next time 73s & FFFR from RADIOTELEX

RADIOTELEX - SHORTWAVE FREE RADIO NEWSHEET - Issue 70 / Vol. 3

R.T., c/o Duempter Strasse 6, D-4100 Duisburg 12, West Germany.

March 25th, 1986

A bright and sunny Tuesday afternoon

seems to be the right atmosphere to bring you this new edition of RADIOTELEX; to begin with, special thanks to those eight people who contributed to this info-bulletin in some form or another !

This tiny editorial appears to be the best spot to mention that we've put together a "general information sheet" which tells you everything you need concerning subscribing to RT including the current rates. In case your sub has run out, you'll automatically get that sheet and so will everyone who has asked for a sample copy.

Moreover, a new info-sheet about our SAE-service is now available free upon request. Please note that at present we can only supply mint stamps from the Netherlands and the UK apart from West Germany, of course.

Alright, enough of that. Let's open the LOGBOOK now :

A word about our medium wave loggings: We are only interested in stns putting out some kind of international programme, ie. not someone who plays polka music to celebrate his grandmother's 89th birthday. Please keep in mind that the date (UTC) when you first picked up that station is the only important one; otherwise you may disturb the mental order of our editorial staff as happened some lines above...

Gosh ! Too little action ? Well, here's the NEWS :

Radio East Coast Commercial, P.O.Box 5, Hunstanton, Norfolk PE36 5AU, England, has dropped its 41mb outlet and will re-open 11584kHz soon. The 26mb rig shall be ready shortly but may be put on the air at any Sunday apart from their scheduled 1st Sunday txmsn on 6230kHz. (A-UK)

Attention: Deadline for RT 71 is April 8th
(a Tuesday as usual) !

NEWS contd:

European Christian Radio is the name of a new private station from Italy which broadcasts with 100 watts power on Sundays 0955 - 1300UTC on 7335kHz. Address: EFG, Postfach, A-2345 Brunn, Austria.

Radio Gravestone International, Postbus 725, Barrie & Ruth Johnston Arnhem (NL), is a new German station which had their first two 90-minute-broadcasts relayed by the IRRS recently. Further shows can be expected soon; just listen out for their slogan "the voice of permanent happiness" (or was it drunkenness, we wonder).

U
ANORAKS
P.O. BOX 539
BLACKPOOL FY1 4RE
England

Radio Joystick, c/o Postfach 220342, D-5600 Wuppertal 22, FRG, whose old test tapes are still aired over Milano from time to time intends to have this situation stopped very soon and have new shows broadcast instead. Besides, Joystick is looking for an FM-relay, so perhaps a "border blaster" from Belgium may contact them at their address ?!

Monitor magazine issue 33 (spring 86) is out now, the first one after its old ed Buster Pearson's death last December. The new editorial staff has by all means managed to keep up the excellent standard of that mag which contains 68 pages this time. Send at least 25p / 3IRCs to 31 Avondale Road, Benfleet, Essex SS7 1EH, England for your copy.

Radio North Star was logged March 16th when they QSOed with R.Rainbow from Drogheda; the station mentioned that they were on a mobile test txmsn from Scotland and said that their tx power was 8 - 10 watts. Regular broadcasts are to commence in two month's time, we quote.

PFBS can now be contacted at P.O.Box 41, 7700 AA Dedemsvaart, Holland for definite, apart from the well-known Salisbury maildrop.

Radio Skywave Int'l plans to use 6207kHz as long as Delmare hasn't returned. Tests on 19 and 25 metres are lined up for the near future and so are local broadcasts to the Dublin area on 96.6MHz FM & 1320kHz AM; a history sheet is to be issued shortly and further infos shall be published every 3 months. P.O.Box 1686, Dublin 1 is the address.

Radio Tutenchamun (c/o Wuppertal) intended to have their first 1-hour-show relayed by Milano March 22nd but this didn't take place for an unknown reason. By the way, some RT-readers may find a questionnaire enclosed with this issue (fill in and, perhaps, win a price...).

UNIDs. The German station noted March 9th on 6235kHz was in fact Time Radio putting out a tape of "Flash-1610" (P.O.Box 760, Maastricht/NL).

Radio Universum, c/o Wuppertal, wasn't on the air recently due to security reasons. The staff has decided not to continue with regular broadcasts but when they are back RU may test on 5200 or 5300kHz, so watch out down there.

WLS Music Radio's supposed SW service from Galway/Eire "went up in smoke" according to Anoraks UK. 6240kHz had been selected for this.

Still in Ireland, WRKY which was aired over Radio 101 on 7350kHz March 2nd can be contacted at 40 High Street, Killarney, Co.Kerry, Eire. As that FM-relay had been approved by the station the chances to get something back are possibly not too bad.

Here's the schedule for Dutch piracy on 1508kHz: April 4/5 Radio Arena at 2330UTC; April 5/6 Radio Torenvalk and April 12/13 R.Orang Utan. All stations broadcast from the Gaanderen area and reply to reports.

Finally, a brief item on Greek AM pirates which can be heard late at night on 180 metres 1610 - 1700kHz or further up the dial. These unique stations produce fair signals but suffer from bad mode; apart from QSOs they also play Greek folk music (if you are fed up with Dutch polka..).

73s from RADIOTELEX ... and keep on fighting !

In order to clear our backlog of QSL-infos the last page of this issue is entirely devoted to that matter. Sorry for the delay but we feel the loggings and news items are in general more important than our

QSL - CORNER

That should really be enough for this time; by co-incidence we've found a couple of news items we missed out earlier on :

The Murgrönans DX Club from Gotland (hello good people over there -ed) had a special 20-minute-transmission March 22nd over Milano 7295 as part of the Swedish DX championships. Special QSLs are promised from MDXC, c/o Erik Wennström, P.O.Box 94, 62016 Ljugarn, Sweden. Write in !

Radio Marabu Int'l was heard in the USA on February 15th both in the morning and evening hours when a 45-minute-tape of Phil Abbot was aired. This, incidentally, was the first part of a relay swap organized by Transatlantic Free Radio (TFR has stopped its activities meanwhile).

LISTENING TO THE WORLD

Well, this is it for today, pleased to tell you that we're still in front of midnight unlike at RT 69... don't forget we'll be back in two weeks time, so scan the bands and write in with your contribution !

Cheerio at last,
R.T.

April 8th, 1986

Hi ! (in case you haven't noticed
this is how RT started exactly 40 issues ago...)

Yet another bumper edition of this fortnightly bulletin containing a really monstrous list of loggings; actually, quite a lot of stations have been received over Easter and apparently conditions are not bad at all. So there you are with our latest chapter of the LOGBOOK :

March 28th, 1986 (Good Friday)

Yes indeed, the loggings are over for now ! Well, before we get into the news here's a (rather giant) ADVERT :

Tape offer. A UK DXer is presently selling the following 7 high quality cassettes recorded over the Easter holiday period :

C-60s	28/03/86	Caroline 558	Peter Philips	0950-1050am
	29/03/86	Caroline 558	P. Philips/Kevin Turner	0820-0920am
	29/03/86	Caroline 963	"Overdrive"	0930-1030pm
	30/03/86	Caroline	Birthday Party (part 2)	0245-0345am
C-90s	29/03/86	Radio Monique	0420-0505pm	and Caroline Birthday Party (part 1) 30/03/86 0200-0245am
	30/03/86	Radio Monique	from 0230pm onwards	and R.Veronica's "De Grote Verwarring" and Caroline 558 0357-0405pm with John Lewis
	31/03/86	Radio Monique	(mostly golden oldies)	0310-0355pm and Caroline 558 Kevin Turner 0220-0305pm

Price is £ 3.00 per hour (£ 2.30 if purchased before May 30th); payment only by IMO, British postal order or cash in a registered envelope. By the way, those are the only tapes available for sale, no copies are made of these. Enquiries should be addressed to Tape offer, c/o RT.

For the best selection of Irish Free radio merchandise, incl. 'Station Lists' and exclusive 'ON-AIR TAPES' send 2 IRC's for info to
ANORAKS IRELAND,
310 Collins Ave., West,
Whitehall, Dublin 9

For the biggest selection of free radio merchandise, incl. "Weekly Report" and medium wave frame aerials...contact
"ANORAKS U.K.", P.O. BOX 539,
BLACKPOOL, FY1 4RE, ENGLAND.

Remember :
Deadline for RT 72
is April 22nd, 1986.

All times mentioned are Zulu local time
(ZLT = Tristan da Cunha Summer time -3h)

Free Medway Town Radio, PO Box SH9, Sheerness, ME12 1AQ, England, is off the air at the present time due to severe problems in the OP's private life. It is uncertain when the station is going to return but it appears that this will happen at some time in the future.

Radio Hotel Amigo, Pb 113, 9104 ZJ Damwoude/NL, has indeed been raided last November when transmitting on MW under the name R.Waddenzee. An old army tx used for MW and SW has been confiscated. Anyway, RHA did in fact relay R.Liberty Sound and R.Titanic Int'l over Christmas 85 on 7320kHz over the "odd and old" 50-watt-rig still available. By the way, Titanic (c/o Dedemsvaart) itself hopes to be back on the air soon again, at the latest to celebrate its 11th anniversary with some special shows.

King Radio (ex-Pacific/Hillside) has closed down as its manager Richard Gramham has lost his job. Best wishes though to the staff from RT.

Radio Meteor, c/o Dedemsvaart, from Finland has been fairly active in recent weeks, ie. on March 30th they relayed Radio Torenvalk at 0800UTC on 7368kHz and tested with own programmes 0930-0945UTC on 7314kHz (see logs !) as well as 1205-1228UTC on 7368kHz. A further test was aired on March 31st on 7314kHz again at 0802-0830UTC. Rare stuff indeed !

Super Clan Radio/Delta Radio have been logged lately on 6325kHz, usually right under a strong utility signal. Super Clan first appeared March 29 announcing a test with 100 watts and an address of PO Box 214, Wychen, Holland. Delta popped up March 31st with an own addr: Postbus 30025, 6883 AA Arnhem/NL. It is very likely though that the two stations are different names of merely the same project.

What do you want more ? The next 4 pages full of logs and news are to come out just after the next deadline which is April 22nd, 1986. Until then 73s from RADIOTELEX

Until then 73s from RADIOTELEX

RADIOTELEX -- SHORTWAVE FREE RADIO NEWSHEET - Issue 72 / Vol. 3

R.T., c/o Duempter Strasse 6, D-4100 Duisburg 12, West Germany.

April 22nd, 1986

Hello friends and enemies alike,

let's start this time with a couple of lines dedicated to the German post office :

"... the more it costs the worse it gets
that is if it gets there at all..."

In fact, some major contributions have failed to reach the RT-office in time although they were posted long before. A bit frustrating, isn't it ?

Well, to get things off the ground at last here's our LOGBOOK :

April 6th, 1986 (Sunday) - an updater !

The NEWSDESK (doesn't that sound impressive ?)

The "DPM-Joystick-Info" is a new monthly publication by the staff of Radio Joystick. Issue 1 is just out and contains 10 pages of Free Radio news & music infos, is well laid-out and printed. Write for a sample copy to c/o M.Franken, Postfach 1130, D-4154 Tönisvorst 1, West Germany and enclose 2,-DM in mint stamps/coin

A correction to RT 69 : subs for the FR Listeners Club (Box 99, Northampton/UK) outside the UK cost £ 5,00 and not £ 8,00 as printed. Sorry !

Don't think you're over the adverts, more stuff still to come next page...
By the way, deadline for RT73 will be May 6th, 1986. Why not write in ?

**PIN-MAGAZINE, Postfach 220342
5600 Wuppertal 22, West Germany
Berichte, Fotos und News aus der
Piratenzene, von Offshore - und
Privatsendern auf über 30 Seiten
Probeheft: DM 3,-/£1/US-\$2/3 IRC's**

The "Free Radio Shortwave Directory" is a new publication which gives you a complete as possible survey of all stations that have broadcast in 1985. The FRSD is divided into three parts: part one lists all the stations in alphabetical order along with all frequencies used last year; part two includes a list in freq order and part three contains all addresses sorted by city name. That 28-page-booklet is printed in good quality and costs 4,-DM or £ 1.10 from FRSD, c/o FRSH, PO Box 41, 7700 AA Dedemsvaart, Netherlands.

The Free Radio Service Holland meanwhile is still alive and kicking, besides, FRSH hopes to have soon a relay as Radio Delmare hasn't returned. It is doubtful if this is ever going to happen...

For those among our readers who enjoy guessing addresses from just what they hear through the noise and crackles of shortwave we can now tell you that the following version of Radio Kristel International's addr is 99.9% sure: 40 Oakhill Road, Ashted, Surrey, England.

Radio Limit International's manager Tommy Hopes tells us that he is particularly interested in reports for RLI's relays over Westside Radio on 6280kHz. In future these shall be presented in "special English" !

RADIO LIMIT INTERNATIONAL
Power on Shortwave !!
P.O. Box 22 03 42
D - 5600 Wuppertal 22
West Germany
Pop and Rock for Europe

Further broadcasts over Radio Milano Int 7295kHz continue on Saturdays after 0900UTC. Tommy Hopes has also taken over the German service on Radio Waves Int'l (BP 130, 92504 Rueil Cedex, France) where he shall host a half-hour show every fortnight.

Radio Marabu Int'l, c/o Wuppertal, now can also be contacted at Postbus 19074, 3501 DB Utrecht, Holland. Another 60-minute-programme will be aired over Milano 7295 either April 26th or May 3rd (on Saturday). Marabu's new DJ Tex Willer is to have his first performance on short wave in May, so watch out !

Marconi Radio International is presently operating on 11652kHz each weekend; it might however occur that another frequency change is to take place later on caused by QRM. Address for that quite rare one is: Via Gozzano 8, 40127 Bologna, Italy.

The Nova Broadcasting Service is a US-pirate formerly known as Radio Nova Int'l which shall be relayed by a European SW pirate in due course. NBS is not a simple alteration of a station's name but the station has adopted a completely new format. This includes reggae and punk music presented by the DJs Mon T. Python and Joe Klash. Correct reports will be verified if 2IRCs are enclosed; send them all to NBS, Box 5074, Hilo, Hawaii 96720, USA.

For the biggest selection of free radio merchandise, incl. "Weekly Report" and medium wave frame aerials...contact "ANORAKS U.K.", P.O. BOX 539, BLACKPOOL, FY1 4RE, ENGLAND.

And whilst we are on the transatlantic subjects, PFBS has tested to the USA April 13th at 0400UTC on 6310kHz (at least that is what had been planned) but apparently Pirate Andy hasn't succeeded there. Brief tests on 1509kHz MW have instead produced some success; why not listen out on Friday nights when the OP tries to warm his bones with the help of the 80-watt-rig... PFBS intends to come on May 1st around 0900UTC on 6207, 6293 or 6315kHz !

Rainbow Radio (Germany), PO Box 725, Arnhem, Holland, lately had a one-hour-show aired over Radio Ireland Int'l 6310kHz. Furthermore, a relay over Radio Orion is likely to hit the airwaves on one of the next Saturday mornings on 6240kHz.

Radio Scorpio, Postbus 19074, 3501 DB Utrecht, Holland, has recently replied to listeners' mail among others informing the world of the DJs' brilliant (nick) names: Brewford T. Justice, Tom Lorenz, Sam Spade and Harris. What strong stuff ! Scorpio is currently off the air thanks to Delmare's absence, so the station's future may be a bit uncertain.

The current transmissions of Starlight Radio on 7310kHz will cease very shortly as the operator needs more time for his work, we are told. At the end of March the station was broadcasting in SSB with 120 watts of power but normally the txmsns are in the AM mode with 60 watts 0900 - 1000UTC. No address is known for that station but still some people have managed to get a QSL-card from them.

Radio Torenvalk, c/o Postbus 36, 7010 AA Gaanderen, Holland, plans to have their next broadcast May 3rd/4th on 1094kHz by what time regular transmissions every 1st weekend of the month will be established. These are to go out on 1094kHz but Torenvalk may also pop up on 1508kHz from time to time.

Radio Wireless, Utrecht-address, is a relatively new Dutch station that did a test transmission on 6525kHz January 1st this year. The station plans to operate with between 20 and 50 watts but probably won't be heard until the OP has finished his studies. Another source tells us that Radio Wireless has had problems with the aerial system and may call cq on 6300 and 6310kHz in addition to 6525kHz. On medium wave the station has used the name Radio Ajax in the past.

Varied interest. We at RT would be very grateful if somebody could come forward with the addresses of Countryside Radio and Home Town Radio both logged in RT 71. Thanks in advance !
It appears the Delta Radio broadcasts on 6325kHz mentioned in RT71, too, have been mere relays of the well-known Nijmegen (Gelderland/Holland) FM station Delta on 90.2MHz. Whether this has been a live off/air relay or taped programming isn't known as yet; the actual address should read as follows: Delta Radio, Postbus 30025, 6803 AA Arnhem, Netherlands. The UNID-station on 5295kHz that has been reported in a few RT-issues by now is apparently a so-called spy station transmitting coded messages to secret service agents abroad. That particular outlet has been noted several times on Sundays around 0925UTC with various sorts of music and the numbers woman who fails to count properly from one to ten in most cases... a similar style of broadcasts have been observed back some months on 6350kHz.

Radio 101, PO Box 2, 4680 Gemmenich, Belgium, offers their transmitting facilities to stations interested in relays over 101's 7350kHz outlet. Only a limited amount of airtime will be available for this purpose, so you ought to drop them a line sooner rather than later ! We can already publish a list of fees, so you may check your bank account shortly :
on Saturday 1 hour will cost you 20,-DM (a discount is possible if you hire at least 3hrs of airtime by what each hour will only cost 10,-DM)
on Sunday 1 hour will cost 40,-DM (no discount possible there). The deadline for tapes to be relayed is June 10th, 1986 - hurry up folks !

Finally in this edition - one of these rare QSL-CORNERS :

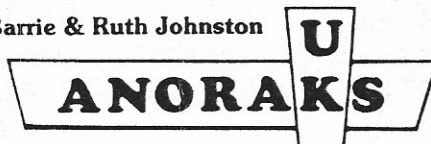

R.Jessica	7350kHz	37days	IRC	form letter incl QSL
	7350	24	2xRP	letter stencil
PFBS	6293	12	RP	QSL-card, sticker, letter
R.Limit Int'l	6280	19	RP	QSL-letter, info-sheet
Westside Radio	6280	36	IRC	QSL-card, poster, letter
R.Rainbow Int	6240	34	IRC	form letter
R.Privat	6240	12	SAE	QSL, letter, card
R.Joystick	7295	18	SAE	QSL-letter
R.Meteor	7368	171	2IRC	QSL-letter, pers.letter
R.Scorpio	6207	114	SAE	QSL-card, info, sticker

And that is basically it for this time. Watch out for RT 73 to hit the streets little after next deadline which is May 6th, 1986.

RADIOTELEX - SHORTWAVE FREE RADIO NEWSHEET - Issue 73 / Vol. 3

R.T.,- c/o Duempter Strasse 6, D-4100 Duisburg 12, West Germany.

May 6th, 1986

Radioactivity is in the air for you and me...

... how true these lyrics by Kraftwerk are nowadays. Well, let's talk about radioactivity for a couple of moments, pirate radioactivity to be precise. For the first time of yours truly's editorship we have a real load of logs and news, so a selection has to be made. A record number of contributions has been reached this time with 19 people sending or phoning in their material. Thanks a lot !

The NEWS

Radio Apollo International (PO Box 5, Hunstanton, Norfolk, PE36 5AU, England) is planning to have soon another MW relay on 180mts, probably along with Radio Enterprise (Postbus 19074, 3501 DB Utrecht, Holland). The Dutch relay facility they use generates 200-300 watts power (1kW at peak they say), modulation shall be better next time, too.

Radio California is the name of a new project from West Germany; this new station intends to be relayed once a month by Milano and Waves. Besides, airtime over Radio 101 has been booked for Sunday transmissions in June or July this year. Address is c/o Postfach 220342, D-5600 Wuppertal 22, West Germany.

Radio Casablanca Int'l, Postbus 25, 7880 AA Emmercompascuum, Holland, hopes to be back by June or July on 1618kHz. Listen out for this stn during the first half of the week (ie. Monday/Tuesday/Wednesday night) around midnight. Casablanca also intends to start on 47mts short waves; QSLs and stickers are available from the above address.

Radio Channel 292 has returned to shortwave after about ten years of absence May 4th with a test transmission on 6207kHz. Reports are urgently requested and should be sent to the Wuppertal maildrop.

Radio CLCG, c/o Postfach 540101, D-4100 Duisburg 11, West Germany have sent us some info stating that they hope to be audible again over the next weekend via Radio Pamela on 6603kHz (Saturday 0645-0730 & Sunday 0800-0845) and possibly via another station on 48mts (Saturday at 1300 and Sunday at 0800). Regular broadcasts over Pamela are lined up for the future. The multilingual "CLCG International" show is now put out every 3rd Sunday for one hour by Radio Rainbow Int'l on 6240kHz, from May onwards QSL-cards will be available for that relay broadcast.

The MV Communicator (formerly home of Radio Laser 558) has been sold to East Anglian Productions, a Frinton-on-Sea based organisation that has produced a number of offshore articles in the past, for £ 35,000. The ship's new destination is uncertain at the moment, so we better won't comment on the rumours circulating at present. The return of Laser 558, however, appears to be highly improbable.

Countryside Radio which has been logged quite often on 6298/9kHz in recent weeks has the following mailing address (skip your earlier versions): SW1, PO Box 105, Folkestone, Kent, England.

The Free Radio Listeners Club (FRLC, PO Box 99, Northampton, England) has decided to issue a quarterly spoken magazine on a C-90 cassette; in addition, a monthly printed "FRLC-Update" shall hit the streets and will be offered to everybody who sends in double return postage. A sample of their tape mag "Audio News" can be yours if you send a suitable tape along with triple return postage to their address...and don't forget to ask for some further info about this non-profit making club.

To many DXers delight, FRS-Holland had a comeback broadcast over the IRRS on 6221kHz April 27th. Quite a number of new relay facilities seem to be available at the moment such as the IRRS (possibly every 3rd & 4th Sunday a 3-hour-broadcast) and the Irish Radio Rainbow Int'l (every 2nd Sunday for 60mins). Apart from that, Delmare still ought to return very soon on Saturday but so far nothing has been heard there. Although these are at the present stage plans, keep a watchful eye on 48mts for FRS. Not to forget they do have an extensive sales list available that includes lots of radio tapes, T-shirts and heaven knows what else; why not inform yourself by sending 1 IRC to their Dedemsvaart-address.

And whilst we do a bit of propaganda, if you want to have a look into a really good magazine try issue 20 of PIN-Magazine (Wuppertal-address) which features lots of news, stories and photos on 40 pages. A sample copy is DM 3,- or 3IRCs...

Back in our alphabetical order, Radio Orion tell us that they're using an 18-watt-tx and a half wave dipole aerial for their daily service on 48 metres. 6240kHz is used on weekdays; on Sundays Orion presently transmits on 6266kHz but it has been announced that as soon as a new crystal can be acquired they will use a frequency near 6320kHz instead. If you want to write to the 7 DJs of Orion address your letters to: c/o Liz, M13 Shearbridge Green, Bradford, West Yorkshire, BD7 1HW, England.

Rainbow Radio (Germany), Postbus 725, Arnhem, NL, have tested on 6555kHz April 27th 1135-1203 with 20 watts but still have to improve their mode. 2 IRCs are required if you want a QSL from the station.

Starboard Sound, 32 Victoria Road, Salisbury, Wiltshire, SP1 3NG, UK, intend to have their next transmission in late May. A new set of jingles featuring Bill Mitchell voice overs are now in use.

Super Clan Radio, a relatively new Dutch station on 6323/5kHz where they are regularly jammed out by utility is said to be using 100 watts power. The main DJ's name is Harry Christoph and reports are welcome at PO Box 30025, Arnhem/NL (an addr also used by Nijmegen FM pirate Delta Radio).

UNIDs. Indeed, we managed to sort some of these out at last :

March 16th, 6275kHz Radio Veronica (a Liverpool FM station testing for the first time on shortwave; further tests are expected soon; address is Mr Neil Frazer, 81 Lark Lane, Liverpool 17, England.)

April 6th, 7362.5kHz Radio Iris Int'l, Postbus 2036, Amsterdam/NL

April 20th, 6203kHz Falcon Radio

April 20th, 6290kHz Radio 48 calling cq to WMR-1 (in vain - sorry!)

Radio Universum, c/o Wuppertal, plan to be back with a half hour show over the IRRS on 6200kHz either May 11th or 18th.

Westside Radio has announced that they will be testing on 11463kHz next Sunday May 11th. Address: c/o 310 Collins Avenue West, Whitehall, Dublin 9, Eire. WRI still transmit each Sunday on 6280kHz with 80 watts.

WFRL Wonderful Free Radio London (not WSOL as we stupidly typed in RT72) is a new British station operated by Andy Walker. The station uses the old Starboard Sound rig on 6300kHz as several people have gathered; among others the famous "Tender Trip" programme by Ian Johnstone on London's AM pirate South East Sounds shall be aired when they commence a regular 2nd Sunday schedule in May. The Hunstanton mailing address is used at the moment.
/ Wavelength issue 9

Radio Woodpecker which has been raided by the Dutch RCD back in November 1985 planned to return in spring this year but apparently hasn't done far. The station has been heard on shortwave under the name of Radio Nobody in the past. PO Box 102, 7360 AC Beekbergen/NL is the address.

Radio 101 is planning to have some extra-broadcasts over the whitsuntide weekend May 17/18/19th on 7350kHz including a special live show on Sunday 0800-0930. Listen out for a phone number that will be anned

on the air on that occasion. PO Box 2, 4680 Gemmenich, Belgium will get to them.

Varied interest. TWR has cancelled the 1005-1020 broadcast on 6230kHz on Sundays and says the stn may move to 5.9MHz if too much QRM will occur on 48mts, so go out and jamm... oh well.

Liz West (ex-Laser 558) is going to join RTL-208 quite soon; is that Free Radio - we wonder !

Weather predictions for the summer are now heard on Radio Tutenchamun courtesy of Mr. Johnny Schmafusius (believe it or not) !

That's all for this issue; don't worry we'll be back in a fortnight's time

73s, RT

RADIOTELEX - SHORTWAVE FREE RADIO NEWSHEET - Issue 74 / Vol. 3

R.T., c/o Duempter Strasse 6, D-4100 Duisburg 12, West Germany.

May 21st, 1986

Hello there

and welcome to probably one of the worst issues of this magazine. We seem to have broken yet another record as far as contributions are concerned, this time however in a negative sense. Keep in mind that the more contributions we have, the more logs and news we are able to include. Thanks anyway to all those who have given us their support this time; of course, we look forward to hear from YOU, too.

Well, so much for this tiny loglist today; at least we hope to publish a few updaters in RT 75.

The NEWS

Britain Radio International (Postbus 19074, 3501 DB Utrecht, Holland or 32 Victoria Road, Salisbury, Wiltshire, SP1 3NG, England) is off the air at the moment to allow the staff to sort out one or two problems. BRI incidentally wants to be back as soon as possible, probably for the station's 6th anniversary in June.

Radio California, c/o Postfach 220342, D-5600 Wuppertal 22, West Germany have had their first transmission aired over Milano 7295kHz May 10th; some problems occurred on that occasion as RMI only put out side B of the tape sent to them. California may be heard again on May 24th via Milano, future relays over Radio Waves and 101 are also lined up.

A rather surprising return was made by Radio Dublin on their shortwave outlet of 6910kHz lately. Relays of the station's local AM/FM broadcasts have been observed, the signal is good as it used to be. Apart from that some improvements to the modulation have been seemingly undertaken. Radio Dublin can be reached at 58 Inchicore Road, Kilmainham, Dublin 8, Republic of Ireland.

For the biggest selection of free radio merchandise, incl. "Weekly Report" and medium wave frame aerials...contact "ANORAKS U.K.", P.O. BOX 539, BLACKPOOL, FY1 4RE, ENGLAND.

Radio East Coast Commercial, PO Box 5, Hunstanton, Norfolk, PE36 5AU, England, tell us that their 26mb service on 11584kHz is mainly aimed at the DX-audience in Italy and the Americas. However, no reports have been received for this so far but that is possibly due to problems with the aerial system. Watch out for them on their regular broadcast on June 1st which is also put out on 48 metres.

KZEW is the callsign of a Dallas FM station that has been featuring excerpts of UK based offshore and landbased free radio stations in DJ George Gimarc's Sunday evening "The Rock'n Roll Alternative". KZEW would like to hear from UK Free Radio listeners and operators who can phone in live into George's show any Monday 0300-0700UTC using this number: 010-1-214-977-6484 (from Britain we believe) or drop a line to KZEW, Communications Centre, Dallas, Texas 75202, USA.

Marconi Radio International, Via Gozzano 8, 40127 Bologna, Italy, has issued an info-sheet which amongst others contains the station's broadcasting schedule: from September 15th to June 14th Saturdays at 1330-1730CET & Sundays 1130-1630CET and from June 15th to September 14th Sundays 1130-1630CET & Mondays 1330-1730CET. Their signal on 11651kHz is put out by a home made 30-watt-tx and "inverted V" antenna. Clubs and organisations which want to have a DX-programme in either Italian, English, French or German aired should write in today as the station's slogan says MRI intends to become "the DXers' radio".

Publications: new on our desk this time is edition no 2 of the "DPM-Joystick-Info" full of useful info including the results of the CLCG pop poll earlier this year. All in German, available for 2,-DM from c/o M.Franken, Postfach 1130, D-4154 Tönisvorst 1, West Germany.

Wavelength 9 is out meanwhile (good as ever) covering all aspects of British Free Radio and lots more. You can obtain your copy by sending 50p or 3IRCs to the Hunstanton mailing address, we can certainly recommend it.

The NEWS (contd)...

Radio Pamela has not been heard much on shortwave in recent weeks, we guess this is due to their daily broadcasts on mediumwave 1608kHz with 35 watts power.

Super Clan Radio, Postbus 30025, 6803AA Arnhem, NL, is in fact identical with the Nijmegen FM operation Delta Radio on 90.2MHz. SCR is looking for a new frequency at present, there are also plans to start a daily service on shortwave including a German service. Apart from music the station wants to provide satirical newscasts but apparently this will not begin before SCR's reception has improved.

Radio Universum, c/o Wuppertal, had a brief appearance over the IRRS on May 11th; further broadcasts over RU's own tx facilities might follow shortly (we hope). Anyway, new QSL-cards are available by now.

There you are, that's all the stuff we have... as you may have noticed meanwhile only three pages this time thanks to the lack of loggings. We thought we better not bless you too much with various promo items and instead save the money for a better fortnight ! June 3rd will be RT 75's deadline, so please send in your contribution ! Until then 73s from RADIOTELEX...

Gosh! We haven't finished yet; at last some info in the QSL-CORNER :

Voice of Guernsey	6205kHz	26days	IRC sent	QSL-card, various postcards stickers etc.
Radio Pamela	6205	10	SAE	QSL-card, pers.note
Super Clan Radio	6325	7	SAE	QSL-card, pers.letter, 2 Delts stickers
R.California	7295	11	RP	QSL-card, info-sheet, pers. letter (v/s Charlie)
R.Limit Int	7295	19	2xRP	QSL-letter, pers.note, mini-poster
Marconi R.Int	11652	31	2IRCS	QSL-letter, pers.note, info in Italian & English
Riverside R.Int	6210	16	RP/SAE	QSL-card, CB-card, infos, pers.note
R.Tutenchamun	7295	10	SAE	QSL-card, info-sheet, pers. letter
Radio Scorpio	6206	130	SAE	QSL-card, letter, info
		141	2xRP	2 cards, letter, info
Radio XXII	6200	81	2xRP	very unfriendly and conceited letter(!), stencil

RADIOTELEX - SHORTWAVE FREE RADIO NEWSHEET - Issue 75 / Vol. 3

R.T., c/o Duempter Strasse 6, D-4100 Duisburg 12, West Germany.

June 3rd, 1986

A very big thankyou !

Indeed we are very pleased to see many more contributions compared to last time and (even better perhaps) hardly any complaints coming in. Watch out for a very very long loglist thanks to lots of updaters to RT 74, so if you combine both issues of Telex you should finally have a decent logbook available. Of course, news items or anything else that may be of interest to others is very welcome, too !
Before we forget: the SAE-service is still around and has in fact extended its offers meanwhile. We now have a limited amount of French 2,20FF stamps in stock apart from the usual ones from the UK, Holland and West Germany. For more info, ask for our free info-sheet (it's just as simple as that!).

And there you are; guess you can be more satisfied with this loglist but as always please keep on sending in these items for we very much rely on your contributions. Thanks a lot in advance to you all !

The NEWS

Alternative Vatican Radio which was heard on 6250kHz Whit Monday 1986 was apparently a one-off station run by PFBS's Pirate Andy (we believe). 3 Rosewarne Cottages, Rosewarne Downs, near Camborne, Cornwall TR16 OBE in the UK was the address announced on the air.

Canzoni Radio, c/o Postfach 1225, D-4354 Datteln, West Germany, has recently acquired a 30-watt-tx and plans to start testing shortly on 48 metres. 6243 and 6310kHz are the channels you should monitor for the station which also intends to relay New Zealand's KIWI-Radio (PO Box 1437, Hastings, NZ) - probably even next Sunday ?!

As most of you have noticed, Radio Delmare, PO Box 36, 2050 Antwerp, Belgium, has returned on 6206kHz June 1st after about half a year of silence. Signal strength is good as ever but unfortunately still the mode quality is lousy as before ! Delmare's comeback means that again a lot of stations are likely to have a relay facility but other users of 6205/7kHz should look for a new frequency at once since hardly anyone can compete with the 500-watt-powerhouse...

NEWS (contd)

Let's have a look now at some Finnish free radio activities : Radio Bristol had a broadcast on 6233/4kHz May 4th, their first one since June 30th last year ! Radio Scanwood was on the air once again May 19th on 6271kHz, and Radio Meteor plan further broadcasts on 41mts shortly according to Anoraks UK. As far as we know, all stations use PO Box 41, 7700 AA Dedemsvaart, Netherlands.

Radio Skywave International, c/o IRRS, PO Box 1686, Dublin 1, Eire tell us that they plan to introduce a special Skywave relay service shortly. Stations interested in this may drop a line at the above address; in the meantime the station is busy going ahead with FM and medium wave tests locally in the Dublin area (c/f RT70).

Super Clan Radio, Postbus 30025, 6803 AA Arnhem, Holland has changed to 6258kHz and was noted there last Sunday (June 1st) with good results, they even managed to sort out Big Papa just a few kHz nearby ! For the future, Sunday broadcasts each week are lined up in English and German; as far as what we have heard of SCR so far everything sounds really good. DJs noted of late were Sonja (English) and Hans Kortwijk (German).

Radio Veronica from Liverpool say they have received reports from the tip of Scotland to the Channel Islands for their tests on 6275kHz. Future use of SW is uncertain as most of Sunday morning is needed to move the equipment. Sunday afternoon or night is being considered or maybe Friday night for a dual service parallel to FM 104.7MHz. Veronica recently celebrated their 1st anniversary on air with special guests including Bruce Purdy of Caroline offshore and Adrian Cooke. Address: Neil Frazer, 81 Lark Lane, Liverpool 17, England.

Listen out to WFRL - Wonderful Free Radio London's next regular broadcast scheduled for June 8th on 6300kHz. WFRL is operated by Andy Walker of Starboard Sound fame and transmits every 2nd Sunday of the month with a varied music & information format; c/o Hunstanton will get to them.

Radio Zeta International hopes to find an own tx in the future (have previous broadcasts on 7423kHz been relayed then ?); meanwhile operator Bill Kirkwood is presenting some more shows for PFBS-Radio. Zeta's address is c/o 28 Clyde Park, Hailsham, East Sussex, UK.

Radio 48 still seems to be popping up now and again with tests on 48mts by station manager Howard Bell; the stn can be contacted at both Postbus 19074, 3501 DB Utrecht, Holland and 32 Victoria Road, Salisbury, Wilts. SP1 3NG, UK. Regular broadcasts shall recommence if conditions improve.

And that's it for today; in case you wonder what that almost black rectangle in RT 74 (top of page 3) was meant for: it should have been a sticker of the FR Listeners Club. Unfortunately, our copier didn't like the gold-on-blue design.

Deadline for RT 76 will be June 18th (a Wednesday) as the previous Tuesday is a national holiday in this country. Sorry if we'll be one or two days later than normal next time... bye for now anyhow !

Keeping the Fight for Free Radio alive and kicking!

PFBS RADIO

SUNDAYS ON 60, 48 AND 41 METRES SHORTWAVE!

RADIOTELEX - SHORTWAVE FREE RADIO NEWSHEET - Issue 76 / Vol. 3

R.T., c/o Duempter Strasse 6, D-4100 Duisburg 12, West Germany.

June 18th, 1986

Dear Free Radio enthusiast,

the first summer heatwave has hit us lately and with temperatures rising into the 30s (Celsius - or for those who prefer Fahrenheit 90s) maybe some more people decide to have a walk through the woods on a Sunday morning... anyway, reception results have been quite satisfying these last couple of weeks (that's something we wish to tell you every time of course).

So, without any further gabble the LOGBOOK :

The NEWS

Radio Atlantis SW now uses the Wuppertal maildrop in addition to the Hunstanton-address.

Alternative Vatican Radio as everyone guessed was indeed a one-off by PFBS-Radio (or CQBS as someone else printed elsewhere). QSLs are still available from 3 Rosewarne Cotts, Rosewarne Downs, nr Camborne, Cornwall, TR14 OBE, England. By the way, the Pirate Freaks Broadcasting Service offers an A-3 size black & white poster depicting Pirate Andy's best friends... you can order your own copy for 1.60DM in stamps or 4 5p-coins. c/o Dedemsvaart.

News has reached us from the operator of PO Box 1225, D-4354 Datteln, West Germany, that his address is no longer available

ITALIENSTR. 20 · BOZEN · TEL. 44667

to German free radio stations. This is because the postal authorities have become interested in the PO Box after it was used over the air by an FM-pirate. The most prominent user of the address (internationally speaking) Canzoni Radio intends to hire another maildrop very soon; in the meantime you can still contact CR c/o Datteln. Foreign stations can still use the Datteln-address, so in case you're interested send off for further info today !

Radio Iris, Postbus 2036, 1000 CA Amsterdam, Holland, has tested on 5274kHz both June 8th and 15th with 10, at the latter date 50 watts. Subsequent tests at 0800 or 0900UTC on Sundays are expected shortly on that channel.

The address of Dutch-based Radio Normaal International (logged on 6300 kHz of late) is Postbus 395, 2980 AI Ridderkerk, Netherlands.

Radio Orang Utan ("The big banana on 1508"), Postbus 114, NL- 7040 AL 's Heerenberg, plans to pop up once again on 1508kHz July 13th & 20th, the latter date possibly with Rainbow Radio Germany's Dave Andersen doing a guest performance.

Radio Orion can be contacted at 310 Collins Avenue West, Whitehall, Dublin 9, Eire (the Anoraks Ireland-addr) ! Besides, Orion together with Falcon Radio has initiated a competition; first price is a free year membership of the Free Radio Listeners Club. You just have to answer the simple question: which month did Orion start transmitting on shortwave (well, it wasn't May -ed) ?

Rainbow Radio (Germany), c/o Arnhem, celebrated their 1st anniversary June 15th with a special test on 6555kHz that lasted over two hours ! In spite of technical difficulties the 25-watt-tx was heard in North Germany "loud and clear". Still, relays over Radio Mirage and Weekend Music Radio are to be heard soon. It appears some mail has gone lost in the post lately, anyway replies to all letters which have arrived so far are promised for the summer (of 1986, we hope).

Summer Radio 86 is the name of a new German project which is about to start in late June or July on 48 or 60 metres. The station which (thank God) will use their own tx facilities can be reached at Postbus 41, 7700 AA Dedemsvaart, Holland. RT would like to wish the guys involved all the best of luck for their venture !

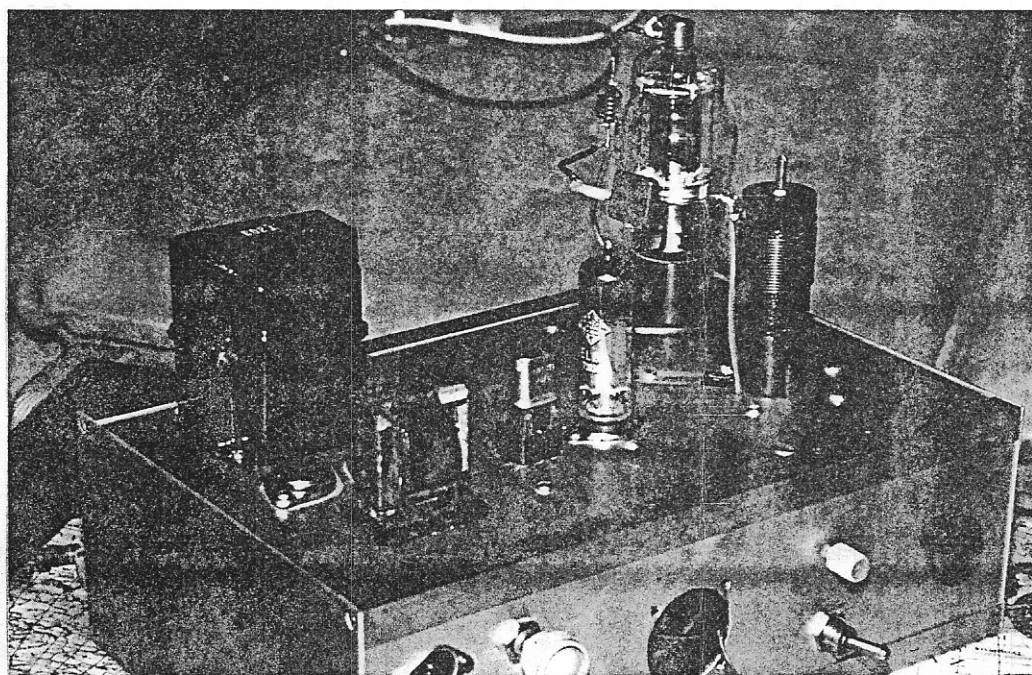

Radio Vallerie has a new schedule as two of the former staff have left to set up a new station called Big Beat Radio on 6870kHz. The sched is: 0900 Dave Evens radio show & FRC slot; 1000 Derek Jones golden oldies; 1130-1300 Mick Anderson pop explosion. Vallerie continues to broadcast every Sunday on 6400kHz. Address: 144 Grange Abbey Drive, Dublin 13, Eire.
/ FRLC Update issue 1

Not in our loglist but nevertheless World Music Radio, Postbus 4078, Amsterdam, Holland, was heard over Radio Dublin May 18th once again. However, as Dublin wasn't noted last Sunday things look a bit uncertain at the moment.
/ PIN-Magazine 21

Before we forget, a few pubs (publications I mean) which have arrived lately: PIN-Magazine 21, 40 pages of news, views and photos, sample for 3DM from Box 220342, D-5600 Wuppertal 22, FRG. Free Radio Waves issue 5, a 36-page-bumper, lots of background & features plus a new SW-section called "Skywave", 80p. or 5 IRCs from Flagstones, West Heath Lane, Sevenoaks, Kent, TN13 1TA, UK. DPM-Joystick-Info, edition 3 out now i A5-size, features & news, 2DM from PO Box 1130, 4154 Tönisvorst 1, FRG.

At last some items in our QSL-CORNER :

station	freq	days	sent	received
R.Dead Man (USA)	6207	71	3IRCS	QSL-card, 2 postcards, pers.letter
Super Clan R.	6258	11	SAE	QSL-card, pers.letter, sticker
PFBS	6293	26	2xRP	QSL-card, sticker, infos
Riverside R.Int	6210	20	IRC	card, CB-card, letter, info, Anoraks Ireland sticker
R.Newspaperman	1616	30	IRC	4 cards in different colours, letter, tx schedule, tourist info
MDXC (via Milano)	7295	7	RP/SAE	special QSL-card
Starlight Radio	7310	60	IRC	card, info, pers.note
R.Mirage Int	7368	50	IRC	card, letter, info
R.Orion	6266	20	IRC	postcard with QSL-text, info
R.Enterprise/NL	1616	80	IRC	card, letter, stickers from Delmare and Radio Domstad
R.Pamela	6299	58	2xRP	QSL-sheet, letter, tape (ordered)
WFRL	6300	43	SAE	letter

That leads us to the end of RT 76; hope you've enjoyed what you read so far !
Deadline for RT 77 will be July 1st, a Tuesday again.

On the left a photo of the PFBS 30W-tx (807 and EL84 valves; 6293kHz X-tal) Used a.o. during the marathon txmsn from Belgium on March 16th, 1986.

73s.

RADIOTELEX

RADIOTELEX - SHORTWAVE FREE RADIO NEWSHEET - Issue 77 / Vol. 3

R.T., c/o Duempter Strasse 6, D-4100 Duisburg 12, West Germany.

July 2nd, 1986

Hello Free Radio lovers,

back again in spite of the continuous heat that makes this place appear rather tropical. Anyway, let me draw your attention to issue 78 out in a couple of weeks' time as always which is likely to look a little bit different than the one in front of you.

To start with, the indispensable note concerning our SAE-service designed for you, the DXer, to use instead of wasting money for IRCs. At present we have stamps from the UK, Holland, France and of course West Germany in stock; for more info see our free info-sheet we'll send you upon request. Get your orders in now !

Lately, some fellow mags have printed that a single/sample copy of RT costs 2 IRCs; how wrong they are (or how kind if they want to give us some extra finances that way) as it's just one IRC or 1.20DM in mint German stamps.

The LOGS (regrettably nothing from Scandinavia this time...)

June 14th, 1986 (Saturday) - an updater !

The NEWS

Radio Atlantis International from Switzerland has been logged in Northern Germany on 6266kHz April 19th with poor reception. The language used was English and the following address was given out: RAI Inc., Postfach 202, 8105 Regensdorf/ZH, Switzerland. / Radiowelt 6

Radio Big Love is a new German station; they can be contacted at Postfach 220342, 5600 Wuppertal 22, West Germany.

Radio Delmara (not Delmare !), a Dutch MW-pirate which put out an international programme lately, has replied to a listener's report by sending a personal letter as well as a photo of an "exotic" valve (world war II manifaction ?). Address is c/o A.Malestein, Haanwijk 8, 3481 CJ Harmelen/NL.

The FRLC / Free Radio Listeners Club, PO Box 99, Northampton, England, has been logged June 15th on 6201kHz. In fact, we have been told that this is actually a station using the above address although we wonder if possibly someone has put out a tape of their first "Audio News" cassette magazine. Any direct info please ?

Irish Rover Radio is probably the UNID Irish station listed in the log of June 8th on 6650kHz (c/f RT 76) though the correct frequency may also read 6625kHz. At least we are quite certain of their address : PO Box 1, Mooncoin, Co.Kilkenny, Eire. By the way, you may also reach a DX-QSL swap group through that address attention of John Cashin.

The PIN-Drop Box Postfach 220342, D-5600 Wuppertal 22, West Germany inform us that their service will be suspended due to holiday reasons between July 28th and August 21st, 1986 inclusively. This means that absolutely no mail can be forwarded during that time period, so we'd suggest that you send in your reports in time if you don't want to wait almost a month.

Rainbow Radio (Germany), Postbus 725, Arnhem, Netherlands, tell us that reception reports will not be verified unless 20 minutes of progr details (accurate ones of course) plus 2 IRCs are provided. Needless to say requirements for a QSL vary quite a lot from station to station, so as a good piece of advice pay attention if a station is making remarks on that matter over the air. On the other hand, some stations should definitely check their QSL-policy when issuing such strict rules but letting listeners wait for a reply more than 6 months.

In answer to a reader's question: Radio Skywave from Dublin uses the following mailing address...c/o IRRS, PO Box 1686, Dublin 1, Eire.

Union City Radio, PO Box 5074, Hilo, Hawaii 96720, USA, made it to the European airwaves courtesy of an exchange agreement with German-based Radio Marabu Int. In return, RMI is relayed in the U.S. but has failed to get any reports from across the ocean so far. Talking of US-relays, Radio Titanic Int'l did in fact receive a report for their exchange programme aired in late 1985 !

Radio Waves International, B.P. 130, 92504 Rueil Cedex, France intends to transmit regularly again in July 86 on 7340kHz with additional tests on 7375kHz. RWI hasn't been on the air a lot of late as Peter Hills is at the moment scanning the bands quite intensively to look for new clear channels. After all these bad conditions he writes he understands now why his PO Box is very often empty... Relays are still carried out from time to time which includes shows by KIWI, R.Marabu Int and Radio California.

WLR Scotland was heard May 25th on 6240kHz at 1207UTC in the UK playing pop music, quite an outstanding log we reckon. Address: 314 Aygyll St, Glasgow, Scotland. / Anoraks UK "Weekly Report"

A few more items we missed in the main part of this news section :

Canzoni Radio now uses the following maildrop addresses: Box 725, Arnhem, Holland plus c/o 3 Rosewarne Cottages, Rosewarne Downs, near Camborne, Cornwall, TR14 OBE, England (appears to be a hot competitor for the world's most complicated mailing address, doesn't it ?).

Radio Europa from Italy has seemingly settled on 7439kHz where they have been observed since May 31st, 1986. The station previously used 9430kHz on Sundays and if we may believe our files the address should read: Via Privata Terzulli 10, 25100 Brescia, Italy.

Staying in Italy Radio West is a very new outlet from that country whose schedule (valid June 28th till July 12th, 1986) lists 11505kHz weekdays 1200-1600, possibly also starting as early as 0800UTC and Sundays 0800-1600UTC. Broadcasts shall continue only if enough response is received at Via Japigia 10, 74100 Taranto, Italy. Drop them a line avanti if they should stay on there !

And that is literally all we have as far as facts are concerned, so before we end up in spreading rumours let's use this chance and tell you about one or two important things.

As we now enter the happy holiday season you may wonder if this means that Radiotelex is to be off schedule for that reason. For the moment we're quite confident that this will not be the case; we shall try and bring out this newsletter on time although it is possible that you'll find some new postmarks on the envelope.

You might also have noticed that in spite of our deadline fixed on a Tuesday compiling dates may shift slightly. This is mainly due to the post office delaying contributions since we think it is better to wait a day if you can hardly fill a couple of pages.

Deadline for issue 78 will be July 15th; watch out for ... well, you'll see.

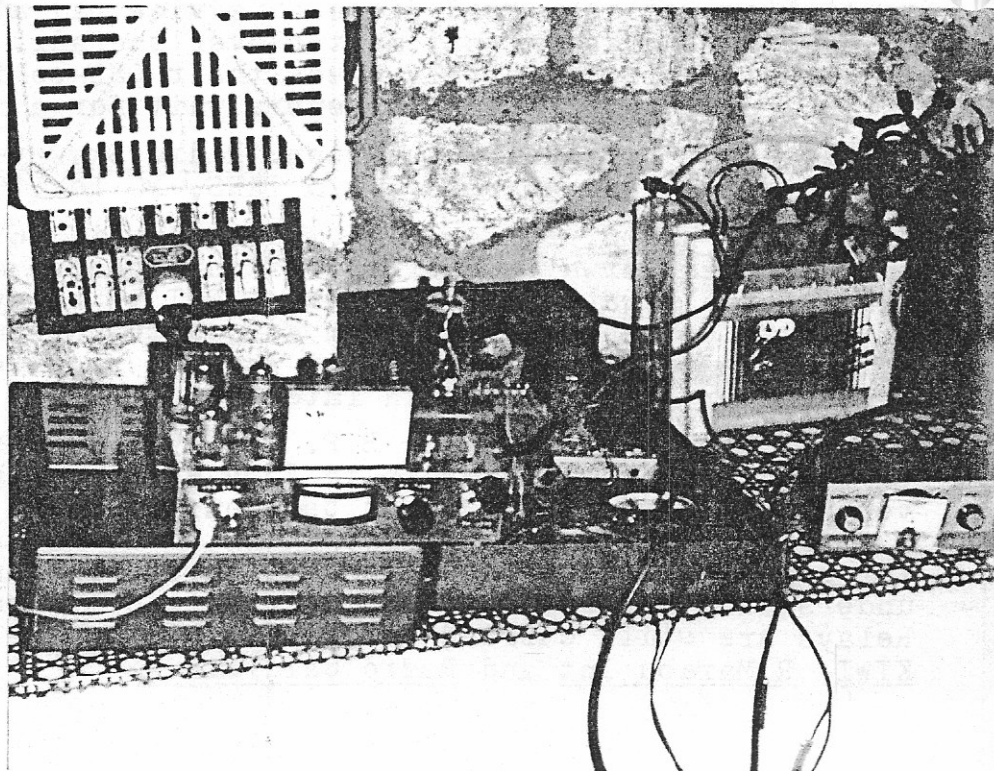

Just before you're getting too tired of this small talk a few more items to blow your mind. The photo depicts (note the correct spelling this time) the Radio Waves 18-watt-tx in 1985. Next to that some oldie stickers from days gone by but please forget about the addresses given there, they are all invalid nowadays. 73s & FFFR from RADIOTELEX

Issue 78 / Vol. 3

July 16th, 1986

c/o Duempler Strasse 6, D-4100 Duisburg, West Germany.

Hello mates,

here we are with a new heading which should be there to please your aesthetic desires, whatever that is.

A UK-reader has suggested to us that Radiotelex ought to print some info on Irish medium wave stations that are audible in far distances such as SE-England or the continent. Although this little newsletter focusses the events on shortwave, we would encourage others to tell us of their observations of MW stations from Eire. We would then make up a list of these and print it if space permits. However, do remember we are only interested in true DX-catches !

Over now to current affairs and quite a lot to report this time...

The NEWS

British Music International, 6 Upton Court, Abdon Avenue, Birmingham, B29 4NT, England is a new station from the British Isles run by Dave Dunlop who hosts the "3D-show". The station plays pan-British music and will be relayed once every two months (through thick and thin !). The first show shall be aired by the IRRS very soon, anyway broadcasts over an own tx are lined up for the future. Listen out for a QSO-station calling itself Radio Dangermouse !

Britain Radio International, c/o Utrecht & Salisbury, has tested a new tx on June 22nd but suffered from technical problems which will be duly sorted out. BRI has also been relayed twice by Radio East Coast Commercial on 6230kHz. Talking of them, RECC tell us that the log on June 8th on 11584kHz wasn't them, the 26mb tx has been out of action since April due to difficulties with the power supply. East Coast Commercial can be contacted via the Hunstanton maildrop.

Radio CLCG, c/o Postfach 540101, D-4100 Duisburg 11, West Germany, intends to have some special programmes relayed by Delmare on Saturday July 26th on 6206kHz. These shall commence at 1300UTC; regular transmissions can be expected for July 27th at 0800UTC.

Apart from various relays, Radio Delmare is also putting out own programmes, usually in the late afternoon. For example, last Sunday they announced to be on the air on 6206kHz until 1615UTC; a service for Africa was scheduled to start at 2215UTC that same day on 9070kHz. Reports etc. to Postbus 36, 2050 Antwerp, Belgium.

Free Medway Town Radio, PO Box SH9, Sheerness, ME12 1AQ, England, has made a welcome return to 48 metres July 13th. OP Mark Thompson announced that from now on Sunday broadcasts each week will continue up to October this year. The schedule reads as follows 0800 - 1100UTC on 6319kHz with 20 watts power.

Regarding the FRLC log in RT 77, we are now confident that this has indeed been a programme meant for broadcasting. According to one of our reporters, regular DX-shows under the name of that radio club are planned for the future over the IRRS. Further info on them is available from PO Box 99, Northampton, England.

The great unknown on 6285kHz (c/f RT 75) has in the meantime been identified as Gamma Radio; that Dutch-based station uses this address Postbus 81, 3450 AB Vleuten, Holland. / Anoraks UK "Weekly Report"

KIWI Radio's operator Graham J. Barclay was fined 500 NZ-Dollars for using a home-made HF transmitter and maintaining a Pye Cambridge VHF/FM tx, in Hastings (New Zealand). Radio inspectors had previously seized the transmitters, stereo, tapes and correspondence, but all, except the tx, were returned. / NZDX Times via Anoraks UK

It seems likely that Radio Noorderzon and Radio Ridiculous will team up in the future according to operator John of R.I.D. who probably does not find enough time to run the station on his own. Noorderzon has recently been heard on 48 mts, we believe, with the co-operation of R.I.D. Addresses: Ridiculous, Postbus 1019, 2200 BA Noordwijk, NL; Noorderzon, Postbus 1017, 2200 BA Noordwijk, Holland.

Yet another new address for Radio Orion, this one appears to be used over the air by the station itself: 82b Edgewood Road, Rednal, Birmingham, B45 8SG, England. Orion keeps on transmitting daily with 6240kHz used on weekdays and 6266kHz on Sundays. The latter is to be changed some time in the future, 6274kHz has been in the rumours of late. German programmes are aired every Sunday 0900 - 1000UTC; before 0900 the station has been heard with test announcements (what are they testing there ?).

We have just received an info-sheet from the German free radio station Parrot Radio from which the following lines are quoted :

"Parrot Radio is still alive. However, we decided to stop relay activities (in May 1984 the station intended to hire airtime over Delmare but couldn't as they were off the air due to the raid -ed) because of the great number of odd stations from West Germany being relayed on every station that is silly enough to accept these selfmade, ever stammering DJs. Unfortunately, building up an own transmitter has brought up some major problems so far, e.g. obtaining high-voltage transformers and capacitors. We still have problems with our location, too, because lately we moved house about 140km.

We lost contact with PO Box 41, Dedemsvaart. This is not a problem because we wanted to change our address anyway. At this moment we are without a mailing addr and we invite everybody to tune in our first programme where our new address will be read out.

Parrot Radio is willing to present only Country and Western music provided this format will please the listeners. DJs are Jerry Lee Lewis and Glen Campbell trying to achieve a twaddle-free format of music and information on C & W. Due to security reasons shows will last only 30 minutes but we try to work out a security concept which will allow a prolonged broadcasting period."

Rainbow Radio (Germany), Box 725, Arnhem, NL, are going to broadcast on 6555kHz again on August 10th for at least two hours.

Riverside Radio Int'l, PO Box 39, Waterford, Eire, plan to test on 6625kHz shortly in addition to their regular service on 6210 & 6306kHz. It appears that Joe Cashin is also relaying local FM/AM stations over his rig as he did with WLR - Waterford Local Radio on June 22nd.

Starfleet Radio from Germany hopes to have their 1st birthday show aired over a Dutch MW pirate on August 3rd around 1611kHz. The progr is to last 90mins, other/additional dates are possible as well. Address: c/o Postbus 19074, 3501 DB Utrecht, Netherlands.

Super Clan Radio, Postbus 30025, 6803 AA Arnhem, Holland, has reported in their broadcast last Sunday that PTT officials have been seen at the tx site. Shots of SCR's antenna have been taken by them; the stn's staff is afraid that a raid is imminent during the next few weeks. Nevertheless, Super Clan wants to carry on as if nothing has happened, with their Sunday broadcasts on 6258kHz.

WABC, a Dublin FM station has postponed its plans to operate a short-wave channel, as the rig is not working correctly at present. / WL10

Wavelength issue 10 is out by now, containing lots of news and info on offshore and landbased stations with focus on the UK scene. The new edition features the S.W. Waveguide plus an interview with "a heck of a lot" Bruce Purdy. 50p or 3 IRCs from c/o Hunstanton maildrop.

So far for the news here; not a very illustrated mag so far but let's see if we can work out something at the end. Keep in mind that RT 79 is out in a couple of weeks' time which means the next deadline is July 30th, a Wednesday. Meanwhile enjoy the summer and stay happy !

Issue 79 / Vol. 4

July 30th, 1986

c/o Duempler Strasse 6, D-4100 Duisburg 12, West Germany.

Happy birthday Radiotelex !

As we now enter our 4th year of publication it's perhaps time to look back and see what was making the news about three years ago. However, our normal pile of logs and news comes first along with a new issue of the QSL-Blacklist. If you have received QSL-verification from Free Radio stations lately or if you even have that feeling that you've wasted some IRCs several months ago, please drop us a line and share your frustration with fellow DXers !

The NEWS

A station called Radio Banana International from Italy is said to be testing on 11505kHz according to "Sweden calling DXers". This is apparently linked with another Italian outlet Radio West heard quite often on 11503kHz in recent weeks.

Radio Delmare, Postbus 36, 2050 Antwerp, Belgium, told one of our DX-reporters that soon there will be Sunday transmissions on 9070kHz in addition to 6207kHz. That should improve reception in Eastern Europe the operator reckons. Furthermore, Delmare's own programming shall be aired on 19 and 31 metres during the afternoon and evening hours beamed towards Africa. No comment on this.

We have been asked to check out if Delmare's 48mb frequency is indeed 6206.6 or 6205kHz... readers who have receivers with digital frequency read-out please give us your impression on the subject.

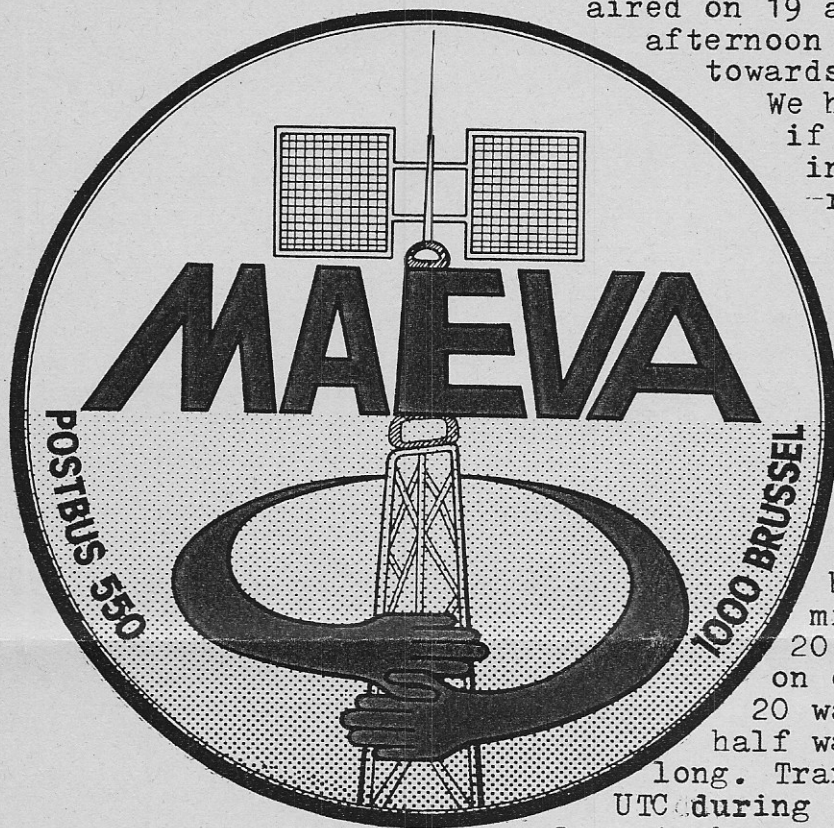

European Christian Radio is reported to broadcast daily (?) 0855 - 1200UTC on 7330kHz in Albanian and the Croatic language. Isn't that amazing ???

Gamma Radio from Holland has so far made four transmissions on June 1st, July 13, 20 & 27th. The station operates on either 6282 or 6302kHz with a 20 watt (PA 2E22) tx fed into a half wave longwire some 23.5 mts long. Transmission time is 0900-1100 UTC during the summer months, there are plans to be on the air every first and third

Sunday of the month with DJs Ronny Wood and John Andy. Gamma claims that the Dutch authorities raided the station during the second transmission and took away the transmitter and power supply. Reports have been received from England, Holland, Sweden plus East and West Germany Address: Gamma, Postbus 81, 3450 AB Vleuten, Netherlands.

Interference. Again last Sunday brought us some interesting developments in this field : AWR Forli (Italy) sent in their schedule for August and September which includes broadcasts on 6215kHz 0300-0930 and on 6207kHz 1500-1930UTC. However, AWR has not been heard with their morning broadcasts on 6215kHz lately but appears to have moved into the regular 49 metre broadcasting band. Besides, no QRM has been noted to Delmare's afternoon service on 6207kHz; could it be that the Italian postal authorities have given AWR the "advice" to use legal channels inside the official bands as they did with Radio Milano's 6221kHz-frequency a few years ago ?

Over now to 41mts where the Hungarian service of the BBC took over 7325kHz after 0900UTC completely smashing 101's signal on the same channel. We'd suggest that 101 then alters broadcast times to 0700-0900UTC as they hardly can compete with the BBC powerhouse there; has anyone noted by the way BBC World Service on 6323kHz during the early morning hours ?

Radio Ireland International has had some problems with their tx equipment but these have now been solved and normal programming began on July 20th. The reason why an extremely weak signal was being heard on 6310kHz was that there was water in the coax cable feeder from the tx to the aerial. The station uses a dipole aerial which is 37 feet long from the centre in each direction. Normal broadcasting times are 0900-1230UTC with relays 0830-1030UTC possible. RII's current address is 31 Mountjoy Square, Dublin 1, Eire but this is likely to change to 10-11 North Richmond Street, North Circular Road, Dublin 1. The date of change is unknown, so it is advisable to listen carefully to what is announced over the air. The station also operates in Dublin on a Sunday evening as "Music 105" on 105.5MHz FM from 10pm to midnight with a power of just 10 watts.

The London-based People's Coice Radio continues to relay their FM-service on 103.5MHz in the 48 metre band at weekends. 6275kHz is the latest channel heard in use; the station rarely identifies itself and only plays few jingles. Disco and soul music is normally put out but also Harry Belafonte has been noted in the afternoon. Their address is 75 The Broadway, Stoneleigh, London, England.

Radio Privat, Turmstrasse 26, D-6500 Mainz, West Germany, is now being relayed once a month by Irish Radio Rainbow International on 6240kHz. Although relays still are somewhat erratic they are usually heard 1100-1200UTC. Programmes are in German and English, a DX-corner shall be introduced as soon as relays will be carried out on a regular basis.

The Sound of Sweden, c/o Dedemsvaart, has done a special comeback broadcast over their own transmitter July 6th on 7360kHz. Listeners were asked to send in reports as if they get a good response the station intends to commence regular transmissions every month !

Radio Sovereign is a relatively new station from the UK (obviously no connection with the famous London golden oldie-station) that transmits on 6270kHz and also on 105MHz Sundays to East Sussex and Kent. The following address has been mentioned over the air: 5 Balaclava Road, Surbiton, Surrey, England.

Super Clan Radio, Postbus 30025, Arnhem, NL, seems to have closed down for good after the incident with the RCD that occurred on July 13th (c/f RT78). We are not sure if the station has actually been raided or if the pressure on them has caused that decision.

Trans Europe Radio (or Trans Europe Music Radio) is a new station which has been relayed by Radio Orion on 6266kHz July 13 & 27th, 1986. Address: c/o 3 Rosewarne Cottages, Rosewarne Downs, near Camborne, Cornwall, TR14 OBE, England.

Radio Tutenchamun, c/o Wuppertal, has recently complained about the East German tx on 7295kHz causing QRM to Milano 0945-1030UTC both to the ITU/IFRB as well as Radio Berlin International itself. Meanwhile, the ITU have advised the station to contact the German ministry of post and telecommunications which, believe it or not, Tutenchamun did. A reply from Bonne is expected shortly, further news to come ! RTUT is on the air via Milano 7295kHz four times a month on Saturday, sometimes even Sunday 0907-1107UTC. Every two months the popular golden oldie show is broadcast.

Radio Universum, c/o Wuppertal, was on the air again on 6275kHz July 20th over their own 30-watt-tx but only produced a poor signal. The 90-minute-broadcast included 45mins own progrs and a Falcon Radio relay each (1000-1130UTC). After the transmission the operator tried about an hour to get his car out of the muddy forest... that's probably the thrill of Sunday morning broadcasting, isn't it ? RU has got new and really good-looking QSL-cards available for every correct report plus 2 IRCs/double return postage/one US-dollar.

The "Voice of Hope" has tested over the transmitter of Radio Ireland International last Sunday on 6310kHz; this religious operation asks for reception reports which should be addressed to the following address (attention: this is not 100% sure !): 67 Dunmore Lane, Balley Moore, Dublin, Eire. If there is someone who has got the complete address please let us know !

QSL-BLACKLIST

Stations mentioned in this column have all not replied to reports sent at least six months ago.

The newspaper article printed below is taken from the "Financial Times" July 2nd, 1986 and reports about the latest developments regarding the community radio project in the UK. After all, it appears that it's all over before something has at all been started. The only hope is that "the disappointed applicants dust off their transmitters and get back on the air" (quoting Simon Parry in Free Radio Waves 6).

Hurd pledges blueprint on structure of radio

BY RAYMOND SNODDY

THE GOVERNMENT will draw up a prospectus designed to create a new structure for sound broadcasting in the UK to take radio into the next century.

Mr Douglas Hurd, Home Secretary, told the Association of Independent Radio Contractors yesterday that this would take account of technological developments such as satellite sound broadcasting channels.

A new legislative framework for radio is considered unlikely before a general election.

Mr Hurd said that a planned green paper on radio would look "radically and wide-rangingly at the future of radio services as a whole."

The Government has been forced gradually to abandon its piecemeal approach to radio reform by a series of events only partly of its creation. They include:

- Severe financial problems of independent local radio.
- The fact that the Peacock Report into the financing of

broadcasting, to be published tomorrow, will advocate selling Radio 1 and Radio 2.

● The last-minute Cabinet committee decision, against the advice of the Home Office, to shelve well-advanced plans to licence 23 community radio stations for a two-year experiment.

"There are various issues which now need attention, including those which you will soon see the Peacock Committee has raised," Mr Hurd told the association's annual congress.

He said the green paper would look at the spectrum available for radio and how it might be used most effectively in the public interest, and at Independent Broadcasting Authority proposals for an independent national radio service.

"The case for a new service providing competition with the BBC at national level is strong. But developments from the Peacock Report, the green paper and other directions

could have fundamental implications for the nature, organisation and funding of a new ILR service," said Mr Hurd.

Against such a background of uncertainty there was a strong case for not rushing into legislation.

The Home Secretary, in his first public statement on the Peacock Report, said the Government did not wish to enter into commitments without providing opportunity for public debate.

"Final decisions will be taken after that public debate," he said.

The Peacock Report was an "important, highly-intelligent and challenging document." It should not be judged on the basis of leaks.

On community radio it had been difficult to get the balance right without changing the law to establish safeguards for the public, while excluding the Government from direct supervision of broadcasting services.

RADIOTELEX - NOSTALGIA ("Look back in danger")

Going back in time just three years I wonder if that's a suitable headline but anyway, let's take a rest from all the comings 'n goings on shortwave these days and have a look at what the loglist was like in issue one :

July 24th, 1983

6205	FRS-Holland via Delmare	6317	R.Enterprise / Dublin
6206	R.Delmare	6910	R.Dublin 2
6225	BRI	7290	UNID (Jan Rap ?)
6244	R.King Kong via Daytona	7315	R.Lynda
6267	R.Krypton	7325	Scandinavian Free Radio
6268	Capital Radio / Dublin	7340	R.Atlantic 2000 Int
6293	R.Ireland Int		

July 31st, 1986

6200	UNID (R.Santana ?)	6260	R.Krypton
6206	R.Delmare	6280	Westside Radio Int
6225	BRI	6293	R.Ireland Int
6225	R.49 Int via Mi Amigo / NL	6910	R.Dublin 2
6230	World Music Radio (Venlo)	7320	R.Stella
6240	R.Northern Hemisphere	7373	UNID (Station 41 ?)
6243	R.Lynda	9424	R.Europa Int (Italy)

I guess experienced listeners do remember most of the names listed here, some stations are still active nowadays such as FRSH, Delmare, BRI, Westside, Ireland and Atlantic 2000. Most of the other ones have silently disappeared and might even pop up again next Sunday, who knows.

All in all RT used three mailing addresses, the first of which is printed on the oldie sticker next to this.

Pasttime activities included a stations' maildrop and a telephone service. We still operate an SAE-service, details are to follow in the next issue of this newsletter !

The latest on Free Radio

GENERAL INFORMATION

Due to this issue extended to 6 pages and a number of subs running out now we have to devote some space to these things nobody is interested in but have to be printed for the sake of the mag :

If you find a sign like "*" on the envelope you've received this in, your subscription has run out and you have to renew it if you require further copies of RT. We can accept cash (German coins, banknotes and stamps; from abroad notes only) and eurocheques in German marks only; besides, sterling cheques are also accepted.

Here are the subscription rates for 25 issues (approximately one year):

West Germany (printed matter).....	DM 22
West Germany (letter).....	DM 30
United Kingdom.....	£ 10
Sweden.....	skr 130

Sample/Single copies of RT are available for just one IRC / 1.20DM in mint German stamps / a couple of 18p UK mint stamps.

And that was the summer/birthday extravaganza which you've hopefully enjoyed. Deadline for RT 80 ("...into the Eighties...") will be August 13th, 1986; we really look forward to hearing from you !

Before we forget: back copies of all issues of RT are available, each one for the price of a single copy (see above).

Issue 80 / Vol. 4

August 13th, 1986

c/o Duempler Strasse 6, D-4100 Duisburg 12, West Germany.

Hello everybody !

Nice to bless you in the heat of the summer with yet another six page treat thanks to an excellent amount of stuff that has arrived here over the last couple of weeks.

Many thanks as ever to all of you who have been so kind and sent in your contributions; remember that without your help it would just be impossible to compile this mag. Amazingly, the post office has also been on our side this time by delivering letters from the UK and Finland in as little as two days' time !

Time now for the current affairs...

Some notes concerning the loglist above: Listeners who receive signals on 6310/2 and 6319kHz please be careful with identifying the stations there. Both FMTR and Radio Ireland International seem to put out more relays nowadays or at least broadcast programmes that have been produced in co-operation with other stations. In fact, we sometimes get reports telling precisely the opposite of what has been stated in another contribution !

NEWS

R.Atlantis International's broadcast on 6266 kHz April 19th, 1986 (c/f RT 77) has turned out to be a hoax, most probably an old tape of the wellknown Swiss FM station from 1976 was aired there. Reports which have been sent to the Regensdorf-P.O.Box won't get replied now, according to PIN-magazine 22.

Canzoni R., c/o 3 Rosewarne Cottages, Rosewarne Downs, Near Camborne, TR14 OBE, England or c/o Postbus 725, Arnhem, NL, has recently acquired a 30 Watt transmitter. Attempts to test the rig have so far failed due to technical problems which, of course, are to be sorted out in the near future. Anyway, keep an ear open on 6282 and 6293 kHz for further broadcasts !

Canzoni Radio-Germany's funky radiostation.

R.CLCG warns us that several new DJs have joined the station which means that their schedule will be extended considerably. The station transmits every 4th Sunday of the month via Delmare on 6206. On August 24th their 1st marathon schedule (so to speak) shall be put out between 0800 and 1730 GMT/UTC. Meanwhile, broadcasts over the Irish R.Rainbow Int have been stopped altogether. The English and Dutch language "CLCG International" has introduced a new competition spot, the first of which will be heard in the August-show. Address: CLCG, c/o P.O.Box 540 101, D 4100 Duisburg 11, FRG.

R.Dutchboy, Postbus 87, 7710 AB Nieuwleusen, NL is currently suffering from tx-problems which keeps the station off the air. However, Dutchboy intends to return to the airwaves soon. (don't you miss some Dutch barrel-organ-sound, too ?).

Gamma R. informs us that the station plans to test on 5200 of 5295 kHz on August 17th for two hours, probably from 0800-1000 UTC. Reports are highly appreciated at Postbus 81, 3450 AB Vleuten, NL.

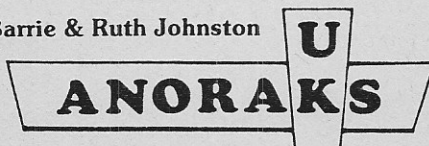

There still seems to be a bit of confusion concerning R.Ireland International and the Voice of Hope (Dublin) which have both been logged 6310 kc/s lately. Some reporters have told us that the frequencies used for the RII-broadcasts and VoH-transmissions do slightly differ (6310/6312 kHz). Does Ireland actually relay these religious broadcasts or is there another tx in use ? After all, here's the latest version of the VoH-address which is likely to be the correct one : VoH, 67 Dunmore Lawn, Ballymount, Dublin 24, Republic of Ireland.

R.Joystick, c/o Wuppertal, has been in the news again for a couple of reasons. To begin with, the Intro-Disco and Soundcheck shows will be abandoned from now on as these programmes are said to be too chaotic, among other things. In the meantime, DJs Pete, Dieter, and Michael are working on a new, own project, details of which will be announced soon. As far as Joystick is concerned, new DJs are required who are able to present regular shows featuring funk - disco- soul - music. Station-manager Charlie Prince (Prince Charles ?-tw) has also told us that he will be away for several months in France, therefore, a few emergency-programmes will be aired by RMI over the following months. Listener's mail cannot be answered during that time-period which will last until February 1987 inclusively.

RADIOTELEX -

PAGE : 5 NO : 80 1986-4

Radio Madison, c/o Dedemsvaart, has made another comeback broadcast changing from one frequency to another in the 41 metre band on August 10th. DJ Eddy Stone (in German Eduard Stein) announced a phone number, Switzerland 33431799. By the way, this was already promised over a year ago.

Radio Mirage, P.O.Box 2778, Elverhoy, 9001 Tromso, Norway, is also off the air at the moment due to transmitter maintenance but hopes to be back again shortly.

Publications: PIN-Magazine 22 is now available covering all aspects of free and private radio in Europe and elsewhere. The new edition contains 40 pages and is highly recommended by us. Full details from that tiny able-label sticker on page 4. Three pages are devoted to a very comprehensive frequency and address directory of shortwave pirates.

DPM-Joystick-Info's final issue is out by now, 16 pages of interesting news and features. Send 2,- DM or 2 IRCs to PO Box 1130, 4154 Tönisvorst, West Germany.

Radio Scanwood from Finland plans some test transmissions in the 41 metre band, maybe on August 17th. Scanwood was on the air June 15th, 1986 on 6205 and 6217 kHz. c/o Dedemsvaart-address.

Radio Sovereign from the UK (6270 kHz) seems to have linked up with Free Medway Town Radio and has been heard quite often on 6319 kHz in recent weeks. During these programmes it was mentioned that Sovereign can now be contacted at the FMTR mailing address, it is not known whether the previously announced addr (5 Balaclava Road, Surbiton, Surrey, England) is still in use or not. FMTR can be reached at PO Box SH9, Sheerness, Kent, ME12 1AQ, England.

Starfleet Radio, Utrecht maildrop, is likely to be relayed by Radio Orion on August 16th or 17th for two hours.

According to a message from Radio Titanic International, the station is presently installing a 60-metre-band outlet which might be used soon in parallel with one of the normal pirate bands. So check out for RTI around 5.3 MHz as well.

Unfortunately, Titanic didn't give any information concerning their birthday programme which should have taken place around August with various shows on 48, 41 and 26 metres. Did they forget it ?

Trans Europe Music Radio wrote in and told us that they don't have a QSL-card available at the moment although all reports and letters actually will get a reply. TEMR's listeners are asked to design a card on their own which may be printed eventually. As a truly international station return postage from the Netherlands, West Germany and the UK can be accepted apart from IRCs. The station whose slogan, by the way, is "More music, more often" plays solely golden oldies and can be contacted at the Rosewarne Cotts-address.

An UNID Italian station has been observed on 9400 kHz during daylight hours playing a selection of European pop and Italian songs. It appears the same station had used 9360 kHz before and then changed to the channel in use at the moment. Any further info is welcome, there are rumours that this might be Radio Europa from Italy but so far there has been no proof for that.

Radio Veronica has suspended its shortwave tests on 6275 kHz in order to concentrate on the FM service to Liverpool which is going out weekends on 104.7 MHz. Address: Neil Frazer, 81 Lark Lane, Liverpool 17, England.

Radio Waves International, B.P. 130, 92504 Rueil Cedex, France, is currently on holiday but has announced to return to the airwaves on August 24/25th, the latter date is a UK bank holiday, so take note !

W.R. International is a new station relayed by Radio Orion. The Hunstanton address is used, at the moment nobody really knows what "W.R." stands for, except for the operators, we hope.

Radio 101 has responded to interference caused by the BBC to their 7325-channel and has changed frequency to 7358 kHz last Sunday. As a matter of fact, they ran into some trouble with Radio Madison but the new frequency is an improvement in general. PO Box 2, 4680 Gemmenich, Belgium will get to them.

GENERAL INFORMATION

Due to this issue extended to 6 pages yet again (it's amazing to note we can even surprise the Anoraks people - what about you then ?) here are the subscription rates for 25 issues (approximately one year) :

West Germany.....	(printed matter)	DM 22,-
West Germany.....	(letter)	DM 30,-
United Kingdom.....		£ 10,-
Sweden.....		skr 130
France.....		FF 90

Sample/single copies of RT are available for just one IRC / 1.20 DM in mint German stamps / a couple of 18p UK mint stamps.

Quite a funny edition this time with two different type-writers used, never mind though. Don't forget that deadline for RT 81 will be August 27th, 1986. Until then good-bye from your RADIOTELEX editors.....

Oh yes, here are finally some more oldie items, enjoy them !

Dear Telex readers,

welcome to the first autumn issue with lots
of rain and wind outdoors and probably more
time to devote to your DX-hobby.

This edition will be another 6-pager, for
the last time however as from RT 82 we'll
be back on our normal 4-page-schedule.

Anyway, thank you very much to everyone who
has made it possible to put together this
bumper yet again, especially our contribu-
tors from Scandinavia and the UK. Needless
to say though that every little bit is
highly appreciated from our side !

Again, some remarks on the loglist of today, as we intend to not only give you some figures and abbreviations but also to explain about the current events on the airwaves.

Crystal Radio (7376kHz) seems to have quite a varied choice of music at hand these days as they were heard last Sunday playing music by Modern Talking and Jimmy Hendrix. Perhaps you could think of what these two have got in common, we can't !

Even Caroline 558 has played Modern Talking's latest one which made somebody remark that "things are really not what they used to be".

As a surprise, a Swinging Radio England was logged last Sunday on 6275 kHz (a frequency that leaves a lot of space for speculation !) with Andy Walker plus a female DJ who sounded somehow familiar. Andy also mentioned that Wolfman Jack would do a show later on in the morning... it was furthermore announced that this was a bank holiday marathon transmission (haven't we heard this somewhere before ?). Sadly, we do not have their mailing address available, so if there's someone who has understood their addr checks, please let us know.

Long skip conditions have been noted lately, in particular on August 24th. This meant that the Irish and British stations came in very well; but the continentals (in most cases) not at all. We therefore expect a rather extensive list of updaters in the next issue (or even on page 6)

At present, new frequency ranges are explored by free radio stations such as PFBS (5300kHz) and Super Clan (5944kHz) as 48mts appears to be a bit congested now due to 41mts being almost unusable. Especially 56/57 metres (5.2 - 5.4MHz) should be worth checking nowadays.

Strangely, only continental stations have been or plan to transmit in that freq range, why no UK broadcasters ? It is undoubtedly true that changing the mtr band used needs some preparation but there are still a lot of clear frequencies "down there" and the skip zones are much smaller compared to 48mts. By the way, has anyone else noted those strong carriers on 6225 & 6235kHz last weekend ruining that popular pirate spot.

And finally in this "chat column", brief non-commercial adverts in RT by subscribers are free of charge. In case you don't want to give away your name & address, you may also use the RT-addr provided you replace the postage used for forwarding enquiries that come in.

Please don't forget that the RT-address is not available to free radio stations as a maildrop !

All times mentioned (unless otherwise stated) are GMT/UTC (= CEST -2h).

The NEWS

Radio CLCG inform us that their current programme schedule reads as follows :

every 4th Sunday of the month via Radio Delmare 6206kHz

- 0800 - 0900 UTC "CLCG International" with Steve Young in English and Dutch, includes offshore spots and mailbag
- 0900 - 1000 UTC "The Voice in 10,000 Cities" with Falk Martin Frantzen behind the mike
- 1000 - 1100 UTC "The Voice in 10,000 Cities" (nonstop music + spots)
- 1100 - 1230 UTC "Megamix Test" nonstop music mixed by DJ Binzi
- 1230 - 1400 UTC "Megamix No 1" (60mins nonstop music, free radio tapes then plus spots)
- 1400 - 1500 UTC " / " by Holger Frank (nonstop music plus spots).

This shall shortly be extended by 2 1/2 hrs of more programming, nonstop music, we suspect. Anyway, some CLCG shows are to be repeated next weekend over Delmare either on Saturday afternoon at about 1300 UTC or the following Sunday morning.

Address: CLCG, c/o PO Box 540101, D-4100 Duisburg 11, West Germany.
(By the way, we are not at all connected to that club project !!)

You may remember that in one of our recent issues we asked for help in order to find out the precise frequency Radio Delmare is on. From a number of sources we have now been told that the station is using 6205.8kHz for their weekend transmissions, even though one of our Scandinavian DX-reporters said that Delmare was on 6206.4kHz. More opinions on this subject are of course welcome... Delmare has also announced that their Sunday night broadcasts to Africa etc. are now on 6225kHz which replaces the 9070-frequency previously used.
Radio Delmare, Postbus 36, 2050 Antwerp, Belgium is their address.

Radio Discoline International is the name of the new project initiated by former Joystick DJs Dieter, Michael and Pete; RDI plan to have their first shows aired over Radio Orion 6240/6266kHz soon which will last 60 minutes. Besides, a regular service via Milano 7295 is to come some time in the future, a test tape has already been sent to Italy. All correct reports covered by return postage/IRCs/dollar notes etc. will be verified by QSL-card; there will also be the "DPM-Discoline-Info" available free of charge to everyone writing in (SAE required). Take note of their address: PO Box 1130, 4154 Tönisvorst 1, FRG.

In issue 76 we printed some info regarding a joint competition organized by Falcon Radio and R.Orion. We're sorry to learn that that piece of info was incorrect, in fact, there was no competition at all which is connected with either of the two stations. We'd herewith like to apologize for that error but as you can see it's only humans who run this mag. Meanwhile, Falcon Radio has asked us to print the following statement by station manager Peter Moss :

"Any item mentioning Falcon Radio to be printed in any Free Radio magazine, unless the item has been issued from Peter Moss, then any item to do with Falcon Radio if it is issued by any other individual, then it cannot be considered valid. Also they (Falcon) take no responsibility for people not receiving replies to mail if it has been sent to Falcon via other sources or individuals unless sent via IRRS in Dublin."

In simple English, check all news concerning Falcon with Peter first (hello you other mags !) and only send reports and letters to Falcon Radio, c/o IRRS, PO Box 1686, Dublin 1, Eire.

And to end this tiny news item, the Free Radio Listeners Club has no connection with Falcon Radio, we're told, the FRLC address is still PO Box 99, Northampton, England.

Here's a special offer from Radio Joystick, c/o Postfach 220342, D-5600 Wuppertal 22, FRG, on the occasion of their 1st anniversary. Studio tapes of their birthday show soon to be heard via Milano are available free (!!) on a C-120 BASF CR-E II cassette. Enquiries should be in by October 20th, 1986.

Radio Orion Alternative was heard a couple of weeks ago on 7355kHz where they announced that they were broadcasting from Ireland every day until Friday August 15th 0800-1200 UTC. The address given out was the same as Radio Orion's one but envelopes ought to be marked as "Alternative Orion". 82b Edgewood Road, Rednal, Birmingham B45 8SG, England will do the trick, so to speak.

The operators of the PIN-Drop Box at Wuppertal (see Joystick item) have received a letter addressed to Radio Scorpio which, however, continue to use Postbus 19074, 3501 DB Utrecht, Holland. Anyone connected with the Scorpio project should contact the Wuppertal maildrop then.

Radio Sovereign, c/o PO Box SH9, Sheerness, Kent, ME12 1AQ, England, have recently operated a phone-in service and were quite amazed to get a call from Northern Germany ! The station is reported to use just 5 watts at the present time which is really astonishing since their signal has been picked up regularly on the continent and Scandinavia even. According to Sovereign, weekly broadcasts on 6270kHz shall continue for the time being.

Super Clan Radio has not been raided but has instead suspended transmissions due to security reasons. In the meantime, a new project is beginning to take shape that is to be called "Radio 7" or "Magic 7 - Music". This should start in the not too distant future, and already tests with the 100-watt-tx have been observed on 5944kHz. The Nijmegen FM station Delta Radio 90 as well as Radio Caroline 558 have been relayed there in order to test the rig. The new DJ line-up is to include a number of well-known names, possibly one or two offshore presenters as well.

Super Clan Radio, c/o Postbus 30025, 6803 AA Arnhem, Netherlands.

Radio Torenvalk have written in to us with some news; a new studio has been built somewhere in Gaanderen but some problems have occurred since then. Their tx doesn't seem to work well on 1094kHz although there have been no troubles with broadcasts on 1508kHz surprisingly. Until that situation has been improved Torenvalk will be using either 1508 or 1625kHz. In September there may be also a test on 1515kHz.

The station is proud to have received reports from Spain and Southern Italy although reception in that part of Europe on 1094kHz suffers from interference with an Algerian station. By the end of the year, a 100-watt-transmitter will have been built (one valve 4E27, 1500 Volts).

There shall be live broadcasts on Sunday mornings, once a month. Frequency range to be used is 6260 - 6280kHz which actually is rather congested, we find. Address: c/o Postbus 36, 7010 AA Gaanderen, Netherlands.

GENERAL INFORMATION

Again, here are the subscription details, to be exact, the sub rates for 25 issues (approximately one year) of this bi-weekly newsletter:

West Germany.....	(printed matter)	DM 22,-
West Germany.....	(letter)	DM 30,-
United Kingdom.....		£ 10,-
Sweden.....		skr 130
France.....		FF 90
Netherlands.....		hfl 35

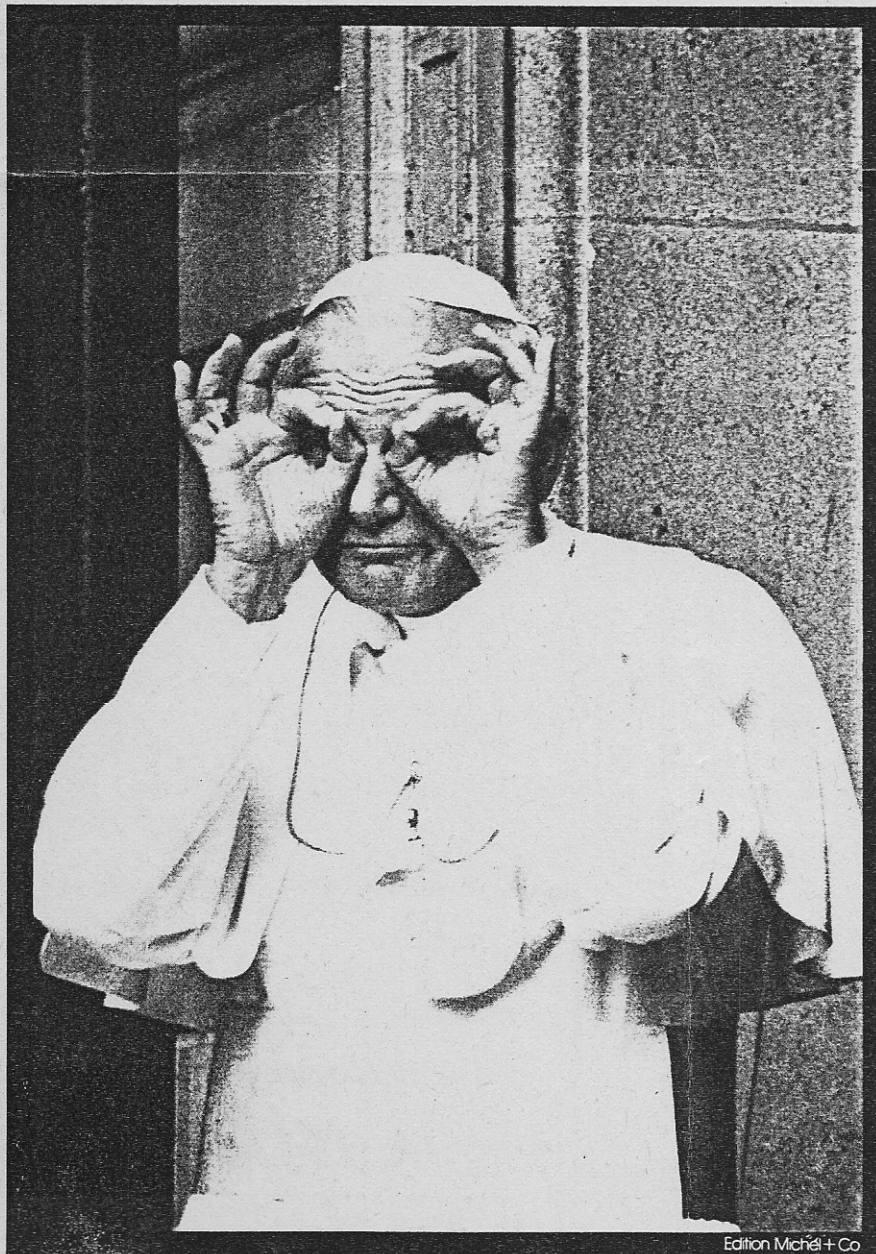

We can accept the following means of payment :

- a) cash in any Western currency, possibly by registered mail
- b) in West Germany only: bank cheques of any type
- c) eurocheques in German marks only (!)
- d) UK sterling cheques

Sample/single copies of RT are available for just one IRC / 1.20 DM in mint German stamps / a couple of 18p UK mint stamps.

ADVERTS

Wanted: recordings of a station that broadcast in the period 1978/80 first under the name of Channel Radio, then as Radio Comet. Enquire at Box C, c/o RT-address.

JRC NRD-515 communications receiver for sale, first class condition, price is DM 2500. Box R, c/o RT.

<< "Hey, those bloody pop pirates, they've even stolen my binoculars !"

Two supplements to this edition :
On August 24th an UNID was heard on 7372kHz with music by GDR formations, e.g. Karat.
Radio 7 (5944kHz) plan to start officially in two weeks' time !

Deadline for RT 82 will be September 10th, 1986 !
Of course, we'd love to hear from you, so
Till next time 73s from

NEWSDESK

British Music International is going to be relayed soon by KIWI Radio in New Zealand for 90 minutes. It appears that a tape sent for relay via the IRRS Dublin has gone lost in the post as we have received word from there that BMxI is totally unknown to them! An own tx has been ordered for future broadcasts "from the lion's mouth". Mailing address is 6 Upton Court, Abdon Avenue, Birmingham, B29 4NT, England.

Falcon Radio tell us that for the present time all transmissions are relayed by Free Medway Town Radio on 6319kHz. It is hoped that things will be back to normal by September/October 1986. Any other station relayed by the IRRS is not affected, Falcon has taken that step due to personal reasons. The station's address (PO Box 1686, Dublin 1, Eire) continues to be valid.

The Free Radio Company as logged in RT 81 is said to be a consolidation of four stations (which ones? -ed), probably from Germany. Address is c/o Delmare, PO Box 36, 2050 Antwerp, Belgium.

Frequencies. As expected our reporters with digital freq readouts have not let us down, so hopefully the following should clear things up: Radio Delmare is using either 6205.8 or 6206.4kHz, so far there hasn't been a kind of pattern when which channel is in use.

Here's a theory about Radio Ireland International's frequency choice: 6311.7kHz is used mostly early in the morning just after the station has signed on, suddenly the freq changes to 6310.3kHz (when the tx has warmed up?!). Later on in the morning there is a change back to 6311.7kHz, maybe due to the rig getting quite hot. What about that?

Radio 101's 41mb outlet is currently drifting between 7356.0 and 7357.0 kHz (!) but the actual frequency is usually closer to 7356.

FRS-Holland, c/o Postbus 41, 7700 AA Dedemsvaart, Netherlands, have celebrated their 6th anniversary lately with a number of special shows, some of which will be repeated in the regular September line-up via Delmare 6206 on the 3rd Sunday of the month. On August 31st, a relay over the IRRS should have taken place on 6830kHz (no logs as yet). That new channel has been introduced since a lot of interference have often spoiled reception on 6275kHz but another freq may be used in case 6830 isn't as good as expected. FRS will soon have new info-sheets available for the usual return postage (2IRCs/1 US-\$/3x75 cent stamps). Write in!

Radio Limit Int'l, c/o Wuppertal, now has new QSL-cards (nice ones !) available for every correct report. RLI has also been relayed by Radio Delmare on August 31st for the first time; in addition progrs via Milano will be aired every two or three months. Future shows will include a Free Radio News bulletin by Tom Clay. Recently, Limit have had some problems with the German post office as a package of listeners mail has gone lost !

Radio Marabu Int'l (Wuppertal-addr) plans to transmit on September 14th via Delmare, that broadcast shall feature a special show on 10 years of punk music 1976-86. Furthermore, 45mins each are to be heard courtesy of Riverside R.Int'l from Ireland on 6306kHz September 21st & 28th.

Radio Meteor, c/o Dedemsvaart, has rebuilt its tx which now has an output power of 30 watts thanks to EL84 and QQE 06/40 tubes. The aerial is a triangle loop for 41mts. Frequencies used are in the 7310-15 and 7368-71kHz range. Meteor was heard last around 7311/12kHz.

Radio Newspaperman Int'l is run by a 21-year-old guy who operates from a studio located 2km from Zutphen (where's the map ? -ed). The tx is an American army rig from 1964 that generates a power of about 550 watts. A 40mtr longwire, 10mts above the ground, is used at present. Address: JW, Baankstraat 4b, 6971 JW Brummen or Box 178, 7240 AD Lochem, NL.

Radio Orion (still daily like the morning paper) have announced that their weekday broadcasts are now on 6233kHz which replaces 6240 due to interference on that channel. Address is c/o 82b Edgewood Road, Rednal, Birmingham, B45 8SG, England, reports are welcome.

More MW news: Radio Pelikaan which is run by 30-year-old radio freak Johan uses a French army tx of 100 watts power. Letters should be sent to Postbus 166, 7240 AD Lochem, Netherlands.

The operator of the by now world famous (oh well..) PIN-Drop Box at Postfach 220342, D-5600 Wuppertal 22, West Germany has sent in a list of stations using that maildrop service at the moment :
Diamond, Joystick, Limit, Marabu, Atlantis SW, Satellite BC Company, Tutenchamun, Universum, California, Original R.Channel 292, Sunshine R. (a local FM-pirate), R.Brazilia (ex-Big Love; by the way, they offered us to carry our RT-adverts a while back, for an incredible amount of money !!) as well as R.Sounds Int'l (planned to broadcast over Irish stations - another relay, gosh). Additionally, the-World Broadcasting System Int'l R. (what a name !) have enquired there but do not send any mail to Wuppertal before you get the permission !

Another interesting item from Scandinavia: Radio Scanwood's transmissions on May 19th, 1985 (c/f RT 48) on 6214 & 6271kHz were made by a group of pirate radio operators who had run many old Finnish stations. They had a two-day meeting on an island in the South Western part of Finland where they decided to put out some progrs. Most of that had been recorded the previous night but part of the txmsn was live. The old R.Bambino 15W mobile tx plus a half wave dipole, 3mts above the ground was used. Scanwood can be contacted at the Dedemsvaart address.

The tentative address of Swinging R.England (c/f RT 81) is as follows: 28 Scillness Road, London, SE23 1NQ, UK. Why not try yourself ?!

According to R.Ireland Int'l, the Voice of Hope is relayed every Sunday 0830-1030 UTC on 6311kHz. VOH also operates on AM & FM, local to Dublin.

Apologies for yet again no QSL-corner in this issue thanks to the amount of logs & news. Still we hope you accept our decision to give priority to the so-called hot stuff, let us know if you can.

Deadline for issue 83 will be September 24th, 1986; we'd be pleased to hear from you, of course. To finish off though a couple of adverts :
Wanted: 2nd hand tape decks, cassette recorders, "walkmen"; offers to Box F, c/o RT. ++ JRC NRD-515 for sale, first class condition, now only for 2499 DM from Box R, c/o RT.

PS: Was last Du Sloß gegen Nina Hagen ?

radiotelex

Issue 83 / Vol. 4

September 25th, 1986

c/o Duempler Strasse 6, D-4100 Duisburg 12, West Germany.

Ook goeiemorgen amateurs & luisternaars,

in other words, welcome to this issue ! Don't worry, the rest of the mag will be as usual in English. Many thanks to all our contributors for their kind help, quite an amount of logs and news has arrived here, so without any further ado let's start off right now.

NEWS

Radio Discoline Int'l, Postfach 1130, D-4154 Tönisvorst 1, FRG plan to have a one-hour-show aired once a month via R.Orion on 6200kHz, with 2 or 3 repetitions. Further relays over Milano 7295 are also heard at present. The maiden issue of the "DPM Discoline Newsletter" has been published, everyone writing in with return postage will get a copy.

Falcon Radio hope to be back with their normal weekly transmissions by October/November 86 in co-operation with the IRRS. Meanwhile, Falcon shows are relayed every Sunday by FMTR on 6319kHz, usually 1200-1400 UTC. In addition, occasional relays are heard via R.Skywave Int on 6261kHz. Falcon's current DJ line-up includes Peter Moss, Tony King, Steve Most, Doctor Robert, Terry Windsor, Steve Kent & Samantha King. Falcon & IRRS have recently published their first "Falcon-IRRS-News" which is two pages full of info on these projects plus relays. 2 IRCs or 1 US-dollar will assure you a copy from PO Box 1686, Dublin 1, Eire.

Free Medway Town Radio, PO Box SH9, Sheerness, Kent, ME12 1AQ, England intend to extend their Sunday schedule to 6 hours after the conclusion of the regular Falcon relays. The Free Radio Show shall be resumed by then (ie. Steve Harper reading out the AUK Weekly Report...).

FRS-Holland's programme tapes have not reached the Delmare PO Box in time for transmission last Sunday, so probably their full schedule is to go out next weekend. R.Scorpio (Utrecht-addr) which normally occupies most of the 4th Sunday on 6206kHz will be heard on Saturday instead. FRS's address is PO Box 41, 7700 AA Dedemsvaart, Holland.

Gamma Radio's operator Peter de Jong tells us that he is going to stop his broadcasts on 6285kHz (v) for the moment by the end of September. Further programmes are to be aired some time in the future, no date has been fixed as yet. Possibly next year there will also be special tests on 60mts in SSB (lower sideband). All correspondence is welcome at Postbus 81, 3450 AB Vleuten, Netherlands.

Radio Neptune from Holland has been observed for the first time August 17th on 6223kHz (listed as UNID) and has since then used 6330kHz several times. Recently, the new address of PO Box 185, Heerde, NL has been announced over the air. To bring a bit of confusion into the story, a Radio Mercury that uses Neptune's old addr (PO Box 30023, 8003 CA Zwolle, NL) transmitted on 6330kHz September 7th, not Neptune itself as we printed in RT 82.

According to the latest Radio Orion info-sheet, the station plans to make regular broadcasts on 7353kHz on Sundays only in the near future. Late Saturday night/early Sunday morning transmissions are lined up on 3463kHz (86mts) as well.

Religious broadcaster People's Gospel Hour seems to be relayed every Sunday over R.Skywave, apparently 0800-0900 UTC. Address is PO Box 500, Boston, Massachusetts 02102, USA.

Süd-West-Radio, Postfach 1471, D-6690 St.Wendel, FRG, put out a test September 14th on 6230kHz using a 20 watts (PEP) rig plus a longwire. Regular transmissions are to be re-installed soon...

At last, Radio Titanic Int (Dedemsvaart-address) celebrated their 11th anniversary on 6293kHz last Sunday. On that occasion, a 17-watt-tx as well as a half-wave dipole, 10mts above the ground, was in operation. Unfortunately, the announced frequency on 60mts hasn't been logged that day for an unknown reason. RTI have promised to repeat that broadcast along with a special English show hosted by Dave Scott on 48mts shortly

WLR International which was received with a test on September 14th can be contacted at 314 Argyle Street, Glasgow, Scotland.

Quite a lot of QSL-info in this edition as we've omitted that column for some time. Finally, deadline for RT 84 will be October 9th, 1986; a Thursday again because we've slightly shifted our publishing date to the end of the week. Therefore, we're now able to incorporate contributions from Scandinavia (thanks a lot !) as well as the AUK Weekly Report on a regular basis.
For now it's good-bye, and don't forget that CEST will end next weekend, at least here in West Germany !

Issue 84 / Vol. 4

October 9th, 1986

c/o Duempler Strasse 6, D-4100 Duisburg 12, West Germany.

Hello good people,

again, two weeks have gone by which means it's time to bring out yet another edition of this newsletter.

First, let's thank everyone who has been so kind and dropped us a line, or maybe a couple, lately. As always, your contributions are an essential part of this magazine, so please keep up your support ! Very soon our stock of foreign stamps will be cleared up which leads us to ask you if you're still interested in the SAE-service RT has been offering for almost three years now. From our point of view, the service hasn't been that in demand, so perhaps we ought to stop it altogether ?! Please let us know what you think of this subject, if no response is received it's likely the service will cease then. For the moment still we're able to offer British, Dutch, French and West German stamps; if interested, enquire for further details.

Some supplementary info to the loggings :

The station listed in RT 83 as "STC-Radio" was in fact the Satellite Broadcasting Co., relayed by R.Skywave Int (September 21st, 1015-1030UTC, 6261kHz).

The "Four Freedoms World Service" seems to be put out by R.Orion on a daily basis at the present time. 4FWS was logged on all dates mentioned for Orion in this issue; however, it is rather difficult to clearly identify the stations as Orion is using jingles apparently made by John England !

The NEWS

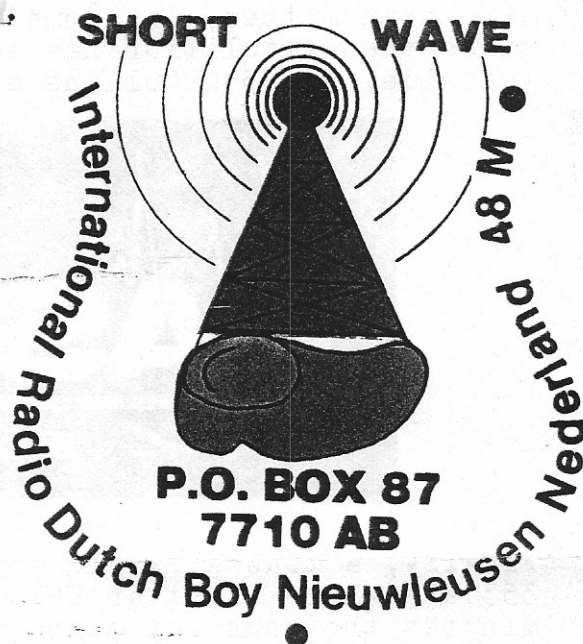

Radio Delmare (no connections with the Antwerp SW station) plan to transmit on 1620kHz October 19th at 0000 UTC with 300 watts power. Possibly, a relay of a German station is also to be featured then. Address: Postbus 5051, 1410 AB Naarden, Holland.

Good News Radio is one of the religious broadcasters currently relayed by R.Skywave Int on 6261kHz and can be contacted at c/o IRRS, PO Box 1686, Dublin 1, Eire.

Radio Kristel International made a surprising transmission September 28th on 6221kHz when they announced that from now on there would be regular broadcasts every last Sunday of the month, with four hours of programming each time. The next one though will go out on October 19th because the staff have other commitments the following Sunday. RKI's present mailing address is 514 Brighton Road, South Croyden, Surrey, England. We'd suggest that the station should receive some kind of award, for the highest number of different addresses used, Kristel seem to change their maildrop almost every time they're on the air.

Radio Nova International of Belgian origin popped up a number of times in our loglist, e.g. last Sunday on 6298kHz where a mixture of chart music and golden oldies plus some soul was heard. Jingles of the famous Dublin Nova have been used, too. You can contact that station at PO Box 5, 2638 Reet, Belgium.

Radio Stella Int'l have recommenced regular broadcasts after being absent from shortwave for quite a while altogether. Following a test on September 21st last Sunday of September saw the first 4th Sunday txmsn, the next one is to be aired October 26th, probably on 6275kHz. The staff consists at the moment of Jock Wilson and Jack Russel (who tends to appear with his own station Weekend Music Radio from time to time as well). Stella presently uses the 32 Victoria Road, Salisbury, Wiltshire, SP1 3NG, England address.

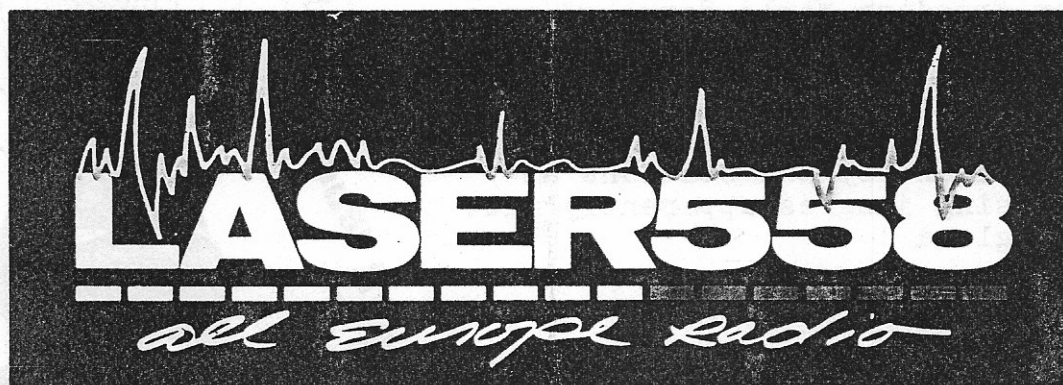

Summer Radio 86 finally made it to the airwaves September 28th on 6298kHz where their signal was ruined in many areas by Radio Brigitte, they were heard in Sweden though which doesn't sound bad, does it ? Reports and letters are welcome at Postbus 41, 7700 AA Dedemsvaart, Netherlands.

Radio Sunrise / Arrow (or Error ?) / Freetime / Free Radio Company are just a few names of stations initiated by H.Balser Enterprises. Their "shows" which contain almost everything possible and impossible are quite frequently aired by Delmare these days. Well, according to the hardly unintelligible announcements you may write in via Delmare's address which is Postbus 36, 2050 Antwerp, Belgium.

Back to some real stations, Westside Radio have recently modified the 48mb transmitter, ie. some valves have been replaced. Reports say that since then modulation has improved.

Westside, c/o 310 Collins Avenue West, Whitehall, Dublin 9, Eire.

Finally, a true airwaves oddity as observed October 8th at 1500 UTC on 3531kHz where first an UNID station in Russian was logged. After five minutes the sound of someone tuning the dialing knob of a radio was heard when all of a sudden the NDR-2 programmes were relayed off the air on that frequency. (To our foreign readers: NDR is the Norddeutsche Rundfunk from Hamburg whose 2nd network is generally on FM only !) Very strange. Maybe a radio ham doing some forbidden things... or what do you think of that incident ? Let us know !

Due to lack of news we use the remaining space for the new QSL-card of R.Limit Int.

Deadline for RT 85 will be October 23rd, 1986. We look forward to hearing from you, so until then 73s & FFFR from RT.

Issue 85 / Vol. 4
October 23rd, 1986

Hi there,

to everybody's amazement the ionosphere has decided to give it a go again and has provided some excellent propagation conditions over the last couple of weeks. As a result of that and thanks to your very kind support we are proud to present one of the most comprehensive loglists published in this mag for some time. Let's just hope and pray that the present situation won't be some sort of a one-off...
More internal news later on in this edition as we head for the station files at first.

The LOGBOOK

October 5th, 1986 (Sunday) - an updater S-rate: UK -CON-SCA-

NEWS

Radio Aro (any meaning behind that ? -ed) is the correct spelling of that "R.Arrow" as mentioned in RT84. Tapes of the Free Radio Company and its associated stations Sunrise, Aro, World Star and Freetime (zu Deutsch: Freizeit - lt. eigener Ansage !) are heard very often over Delmare at the moment; too often as some reporters wrote. We would once again like to warn you of that project, especially when it comes to financial affairs, so be careful and don't send any money to them !

Radio Barrelhouse (not Blueshouse as stated in a back issue of Telex) is the sister station of Holland's famous reggae outlet R.Rastafari; both stations are even part of the Garvey Broadcasting Corporation according to Susan N'Djame. Barrelhouse concentrates on blues and jazz, regular broadcasts every 2nd Sunday of the month at 1400 UTC via Radio Delmare are planned. Reports will be verified if at least one IRC is enclosed; address: Postbus 162, 6680 AD Bommel, Netherlands. / PIN 23

Radio Brazilia, formerly Radio Big Love, intend to have their first shows aired by (yes, you've guessed it) Delmare soon. In addition, there may be relays over Radio 101, the IRRS and probably Milano as well. Brazilia's staff consists of Nick Brennalt, Wolfgang Müller, Marti Wilkes and Mike Jones, the station manager. Address for that new station is c/o Wuppertal. / PIN-Magazine 23

The Dublin-based Energy 103 has been relayed by R.Ireland Int'l last Sunday on 6310kHz and was logged by a number of our reporters. John O' Hara of Energy is quoted to have said that the station had no advance notice of the relay although a different source claims that a phone number for shortwave listeners was announced over the air. Anyway, you can contact Energy 103 at 144 Upper Leeson Street, Dublin 4, Eire.

The Dutch Pirate Station International (DPI) has been observed of late on 7320kHz with very strong signals and good modulation. It appears that there is another station by the name of Radio Pacman who shares DPI's tx or vice versa, full details are not known at present. Apart from their own tests, the French Radio Liberty Sound is put out on occasion, again, it seems as if there is one tx used only. Postbus 41, 8080 AA Elburg, Holland was mentioned, so apparently DPI/Pacman are linked with the old Radio Delta/WBI from that town who used to go out on 4mths in 1983. Quite confusing, those Dutchmen ?!

A rather unpleasant piece of info is that the Free Radio Listeners Club (FRLC) has closed down recently. This was due to the fact that club manager Steve Fisher has not come forward with goodies such as the Update magazine members had ordered or paid for. After all, Steve seems to have embezzled part of the money meant for the club, so there is little chance for those who had joined the FRLC to get their sub fees back now. Both the publisher of "Update" Chris Williams and German representative Thomas Sonntag have dissociated themselves from the club and Mr Fisher's practice of business.

Still, two things seem important at the moment: a) Don't send any money to PO Box 99, Northampton, England anymore and b) Please don't blame Falcon Radio for that incident as there was no direct connection between the station and the club. Falcon themselves are unhappy about the situation but there is hardly anything they could do now. Ironically, Steve "O.K." Fisher was heard twice lately with shows he did for Radio Pamela's medium wave service (put out by Delmare then).

Radio Joystick (Wuppertal-address) have produced some items to please their listeners, ie. a new QSL-card, stickers and a small booklet full of info on the station's past and present have been printed. Between July 1985 and June 1986 200 letters have reached the Joystick office, a survey included in that booklet tells us. At the moment, a special 1st anniversary show is to be heard via Milano as broadcasts on 7295 continue, some FM-activities are also promised for 1987 !

Well, that's probably enough logs for the moment. Before we carry on with our regular newsdesk, here's some info in-between the columns :

Some of our subscribers will find a questionnaire enclosed with this issue of RT, it contains a request to write down some vital info on the station(s) these people getting that sheet are involved in. That questionnaire is part of a project initiated by PIN-Magazine and RT to publish an (as complete as possible) survey of SW Free Radio in 1986. By filling in that form and returning it either to us or to PIN you could help us very much ! In case you are not at all involved in any radio project and have received a form though, skip it, or just pass it on to somebody else. The name of that reference book will be "Free Radio Guide Shortwave" and is to be released in early 1987 (all in the English language !). As it is intended to include all stations active nowadays it's up to you to decide how accurate the item about YOUR station in that book is going to be !

Summer Radio 86
Postbus 41
7700 AA Dedemsvaart
Netherlands

KBC-Radio, Postbus 725, Arnhem, Netherlands, will stop their broadcasts over R.101 soon as they believe that listeners prefer to hear them with their own tx equipment. Unfortunately, these broadcasts are unlikely to take place in the near future as there are quite some problems the staff has to sort out. The KBC-Newsletter will be stopped, no new members can join the KBC club at present. There will be three more issues of that newsletter by when that service will be discontinued, sadly.

KIWI-Radio, PO Box 1437, Hastings, New Zealand, plan to make an appearance in New Zealand again, the frequency range used will be 7240-7300.

Radio Limit Int'l (Wuppertal) inform us that in fact some 50 letters sent to RLI by the maildrop have been lost in the post, so if you've written to the station in June/July this year be brave and face the possibility that your letter may have been among those ones lost ! Limit keeps broadcasting via Delmare once a month, the November show is to contain a Bryan Adams special, the best tracks from the 4 albums released so far are to be played then.

Radio Marabu International (Wuppertal & Utrecht-addresses) plan to present a special Xmas show in December hosted by Phil Abbot and Mark Graison. Listeners are invited to send in brief messages on cassette tape to Marabu (deadline is November 27th, 1986) which will be played over the air. The station offers new stickers which give details about where the Marabu headquarters are located...

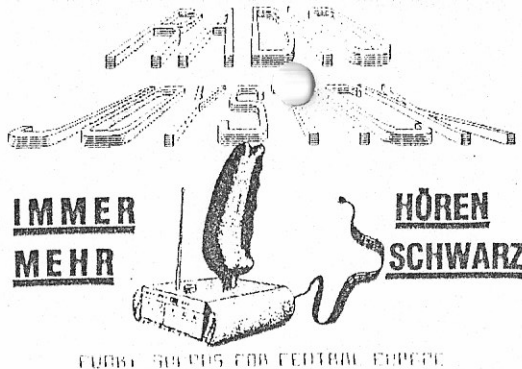

Marconi Radio Int'l have left 11649/51 for good now and have settled down by now on 11545kHz, sometimes drifting towards 11549kHz. Address : Via Gozzano 8, 40127 Bologna, Italy.

North West European Radio is an apparently new station logged October 19th on 6275kHz. It was announced that this was broadcast through a "Radio Starship Network", 24 hour programmes would commence next week ?! Any info on that station is much appreciated. / Anoraks UK "WR 129"

PIN-Magazine 23 has hit the streets, a bumper 56-page treat ! Highly recommended for DM 3.50 or 3 IRCs, lots of features and news plus a bunch of photos in excellent reproduction. Additionally, PIN offers the "Frequency & Address List of all SW Free Radio Stations" that were active during August and September. This is available to non-German speaking readers only, sample copies cost just one IRC; DXers from the UK & Ireland should contact Anoraks UK if interested, otherwise drop a line to PIN-Magazine, Postfach 220342, D-5600 Wuppertal 22, West Germany (a famous maildrop by now, too !).

Radio Pogo 104, c/o Wuppertal, is a new German project relayed by Radios Rainbow Int'l and Delmare so far. There are plans to transmit on FM in the more distant future (probably the reason for "104"). Foreign readers may not be aware of the fact that "Pogo 1104" was the name of a fictional pirate radio station in a German TV series shown in 1985.

Riverside Radio Int'l, PO Box 39, Waterford, Eire, is using 6525kHz on most Sundays presently, with further transmissions at times on 6306 & 6210kHz. RRI is known for relaying several stations over their tx such as Marabu, Hexagon, ABC Waterford and Waterford Local Radio. September 1986 saw the celebration of their 1st anniversary; Riverside's staff comprises Richard, Steve, Clive, Joe, James, Podney (!), John, Simon, Tony, Norman, Dave and a few more, not bad for a relatively small broadcaster, we reckon.

FURCH 944 PPS FOR CENTRAL EUROPE

Radio Titanic I. are scheduled to be relayed by Delmare as a one-off repetition of their 11th anniversary shows lasting 3 hours altogether. RTI welcome all reports at the well-known Dedemsvaart address.

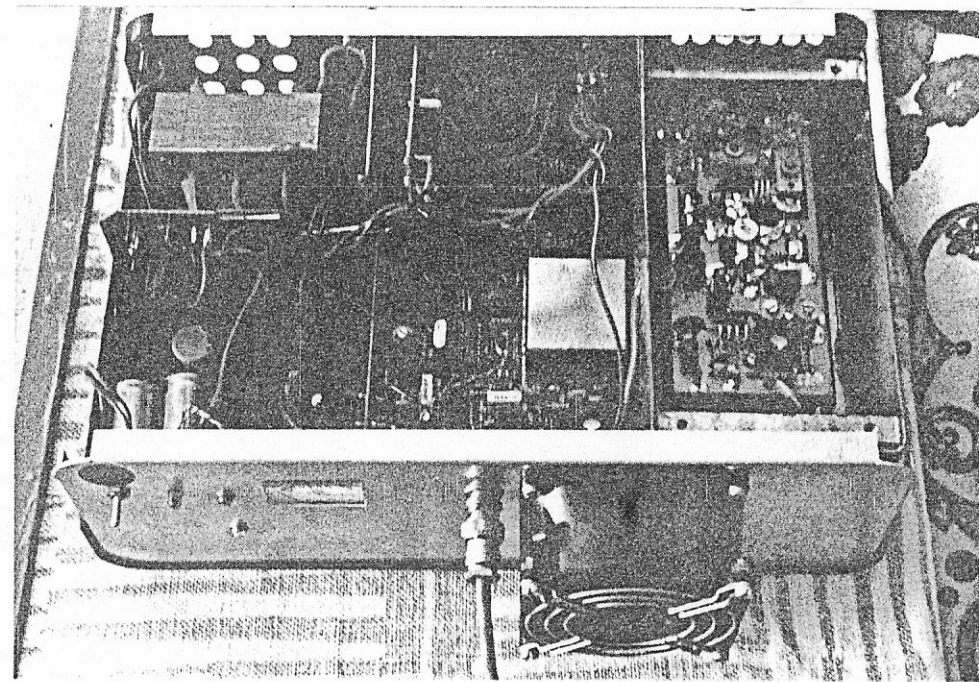

Radio Tutenchamun (Wuppertal) are still alive (and kicking); their new October show is to be heard very soon, probably next weekend via RMI on 7295kHz. RTUT have now received a reply from the German ministry of post & telecom who say that R.Berlin Int'l (GDR) is legally using 7295 as that freq has been registered with the IFRB/ITU at Geneva, however, Milano hasn't done so (which means that RMI has practically the same status as a Sunday morning pirate). The Bonne ministry has advised the station to write to the Italian telecom ministry... will the march through the institutions continue ?

Varied interest. A Südwestfunk (SWF-1) tx has altered its frequency recently from 1485 towards 1512kHz causing QRM with BRT and, as they are on the air 24 hours each day, with the 1508-pirates as well. In some areas of Germany reception on 1508kHz has become hardly possible now, particularly bad for the "Gaanderen network" mainly using that channel until now.

We're told that a tape of New Zealand radio stations is currently prepared for relay over an Irish station later on. Listen out !

News about the SAE (stamped-addressed envelope)-Service : It appears that after all there is a demand for that sort of service, so we will continue for the time being, offering stamps from foreign countries in exchange with your ones. However, we have now run completely out of supply, so orders will be accepted but delivery time may take up to a few weeks - sorry for that ! As soon as we have new stamps in stock, we'll issue a new info-letter with all the necessary details.

At last, don't forget that RT 86's deadline will be November 6th - with some better weather hopefully then (any maybe a QSL-corner again). Here's a shot of the Nuova Elettronica HF 10 tx (FM, around 5 watts) :

NEWS

As a surprise, Radio Aquarius Int'l put out a test transmission last Sunday on 41mts, a VFO-tx with an output power of something in the region of 25 to 35 watts was used. Reception reports are most welcome at the current address Postbus 65027, Rotterdam, Holland; please note that the former addr at Schiedam is no longer available. There are no plans at the moment to introduce a regular service although the station did in the past operate every 1st Sunday of the month on a variety of frequencies such as 6280 and 11470kHz. By the way, the Aquarius DJs also provide the Dutch service on Radio Ireland International.

We have received word from Radio CLCG who tell us that they are not responsible for the repetitions of old "Intro Disco" and "Radio-Mix" shows from December 1985 (!), these programmes have been aired over Delmare on October 26th without permission by the CLCG management. The December edition of "CLCG International" hosted by Steve Young will include dedications from listeners, everyone is invited to send in a written note or the dedication spoken on a good quality cassette tape (not more than half a minute) to Wilfried Meyer, PO Box 540101, D-4100 Duisburg 11, West Germany. Letters should have come in by December 5th, and please keep in mind that no music requests can be accepted. Besides, another special programme is planned for December which is to feature a listener's dedication along with a favourite track, all sent in by November 28th to the above address.

Free Medway Town Radio (FMTR) are now on the air every Sunday from 0830 till 1730 UTC and have recently introduced news on top of the hour, throughout the day. The Falcon relays have been discontinued meanwhile; during the afternoon a number of famous offshore documentaries are aired over FMTR in addition to their own programming. Address is PO Box SH9, Sheerness, Kent, ME12 1AQ, England. FMTR - All Valve Steam Radio (on 6319 & 6370kHz every weekend).

Holiday Radio, c/o Postfach 220342, D-5600 Wuppertal 22, West Germany, has hit the airwaves for the very first time via Delmare on October 26th with a one-hour show by Mike Jones. We are quite certain that the station is the successor of Radio Big Love / Brazilia mentioned in RT 85.

According to Anoraks UK, Radio Ireland International have introduced a new mailing address : 10 North Richmond Street, Dublin 1, Eire which replaces the formerly used 31 Mountjoy Square one.

Another surprise broadcast was made last Sunday by Radio Limit Int'l on 6220kHz, tentatively relayed by a continental station. Some problems occurred with the audio quality (muffled announcements), and several short breaks were noted, too. RLI now issues a monthly newsletter comprising of the most important items taken from the Free Radio News spot by Tom Clay. Issue one is out now, 3 A4-pages available for 1.60 DM in stamps or 21RCs / one US-dollar from the Wuppertal maildrop.

Radio Lynda can now be contacted via 32 Victoria Road, Salisbury, Wiltshire, SP1 3NG, England; Lynda have been logged in recent weeks on 6275kHz as part of a Scottish free radio organisation. The same address is used by Radio Omega that made one of their rare appearances last Sunday.

Radio Scorpio would like to point out that they are no longer willing to reply to those DXers just sending in a reception report without any personal notes, some reports even lacked concrete programme details ! Everyone expecting an answer from that station should therefore enclose some own comments and avoid report forms, otherwise Scorpio will regard the return postage as a donation to the station... Scorpio is on the air every 1st Sunday of the month via Delmare from 1000UTC onwards; watch out for a special line-up of programmes on december 7th, lots of surprises are promised. c/o Utrecht-address.

radiotelex

Issue 86 / Vol. 4
November 6th, 1986

c/o Duempler Strasse 6, D-4100 Duisburg 12, West Germany.

Hello !

Well, it seems that thanks to those excellent conditions we have to do it again and present another extended version of RT. As you can imagine it would be almost impossible to crush all the logs and news received into just four pages. For that reason, we have to stick to that format of A5 reduction as that's at present the only way to get away with more than four pages. We have by now obtained a limited stock of UK 18p stamps, so all orders which have been received here will be dealt with shortly.

The LOGS

One reporter mentions that he has IDed the station on 6331kHz October 26th as Radio Mercury and not Neptune (as in the loglist). Possible connections between those two stations are not yet known as both stns haven't replied to reports yet as far as we know. The UNID Dutch station listed for the same day on 7370kHz announced an address of Postbus 65027, Rotterdam, Holland over the air. The same addr is used by Radio Aquarius Int'l at the moment but apparently that was a different station that shares the address. The ID sounded something like "Suburbia" or "Caledonia"... We can now reveal the complete address of that station logged October 19th on 7374kHz with a tentative ID as Radio Mercury. The addr reads as follows: Postbus 84, 3417 ZH Montfoort, Netherlands. If there's anybody who knows the address of North West European Radio mentioned in RT 85, please let us know, even though that station, we guess, has been a hoax. Who knows ?!

Radio Sovereign from the UK have recently replied to most reports sent in to the station. At present, a 10-watt-tx (one 807 valve only) is in use along with a half wave dipole aerial, according to the operators Tim & Dave Stevens. Address is : B.M. Nectar, London, WC1 N3XX, England. Present broadcast schedule has been announced as every Sunday 0900 - 1300 UTC.

Radio Tutenchamun, c/o Wuppertal-address, have been observed with a test over an own tx according to the announcements over the air last Sunday. RTUT continue with their monthly 1-hour shows aired over Milano 7295; the November broadcast will contain a 30-minute relay of KIWI Radio from New Zealand. In return, RTUT shall be heard via KIWI in the South Pacific over Christmas this year.

A rather mysterious station calling itself Radio Ventura Int'l was logged on October 26th for about an hour on 6203kHz. In the transmission it was announced that this was a test live from Lower Saxony (Niedersachsen) in West Germany; a power of 1000 watts was also mentioned... well, at least the signal was quite strong indeed (even causing some troubles to Delmare nearby). However, the operator had a very strong Dutch accent, so the station's true location might be in the country of Miss Antje (still selling cheese?). Besides, no address was announced but next time the station is on the air a mailbox shall be available.

Radio Waves International, BP 130, 92504 Rueil Cedex, France, have kindly sent in their latest info-material. Another relay over Milano has taken place last Sunday on 7295kHz which gave many listeners the chance to hear that station in good quality. Broadcasts over their own tx are still heard most Sundays, nowadays a nonstop music tape can be noted on 7374kHz in the early morning hours along with an announcement to check out for RWI later on during the day on 7840kHz. By the way, a new QSL-card should be available now. Waves also relays tapes of the new UK-based Sona Sound Radio which can be contacted via the RWI-address as well.

Rumours & allegations. November 19th will be a public holiday in West Germany and probably some further West European countries (bus & bed-day...), so listen out for some Free Radio on 48mts that day ! It may also be worth monitoring 5944kHz again as the start of the Radio Seven project may be there sooner than you expect (but please don't blame us if you can't hear anything then). Finally, it seems SWF-1 has left 1512kHz again and is not causing QRM to the Dutch stations on 1508kHz among others.

WONDERFUL FREE RADIO LONDON

WFRL 6.300kHz 48m

P.O. BOX 5. HUNSTANTON. NORFOLK. PE36 5AU.

INFORMATION SHEET NUMBER 1.

WFRL began testing on 13th April 1986, with a hour and a half non stop music and jingles programme. After our engineers were satisfied the equipment was 100%, the 11th May date was set as our first 2nd Sunday schedule transmission.

This proved very successful, the signal was heard all over the UK and Europe, well over 25 letters were received for the broadcast. Since then every transmission has remained successful, with the exception of the July broadcast, when our engineers went on their holidays, and the station was relayed by the Starboard Sound transmitter, even though the signal was heard in Germany, no mail was received for this broadcast. Up until now, we have had well over 70 letters sent, from the North of Scotland, Wales and Ireland, Sweden, down to the Channel Islands, East Germany and Italy, and of course, the rest of Europe.

WFRL is on the air once a month, on every 2nd Sunday in the month, and broadcasts from the Greater London area, with a power of 30 watts through a $\frac{1}{2}$ wave long wire aerial, cut for 6300kHz.

THE PRESENTERS.

Andy Walker.

Andy became involved with Free Radio in 1975, when he could be heard on the London station City Sounds, then on Kent based pirate KNR (Kent North Radio). After leaving KNR, he ran his own Disco Roadshow for a number of years, until he returned to Free Radio with Starboard Sound in 1985. He has over more than 5,000 records, and a large collection of Free Radio recordings.

Iain Johnston.

Iain has been very well known in the London area for a number of years, for his Tender Trip radio programme, which was broadcast by the MW station South East Sounds, which was closed down from a raid by the DTI in December 1985. Since then, Iain has returned to the airwaves, to present Tender Trip on WFRL every month. Tender Trip is the most up to date Free Radio show on Europe's airwaves, and mostly covers the Offshore Radio scene, with all that is news in the world of Pirate Radio today.

There are other presenters that have been on air with us since we started broadcasting, TJ a black DJ who played all that great soul music, Adrian Cooke from Starboard Sound, and Sproggy, who may not be the best DJ on the Radio, but he plays a important part on site in putting the station on the air. We hope to have a few new voices on the air in the next few months, this hopefully will keep the station sound fresh and lively.

September 1986.

THE SOUND OF FREE RADIO

Issue 87 / Vol. 4
November 20th, 1986

c/o Duempler Strasse 6, D-4100 Duisburg 12, West Germany.

Hi there !

Here we are back again, with more logs than ever and quite an amount of news items. Free Radio on shortwave is alive ! Despite that fact it might also be an idea to check out on medium wave, there may be some interesting catches during the weekend, too. Early sunsets presently allow long distance reception on MW already in the late afternoon and evening, e.g. Dutch stations on 180mts have been logged in Scandinavia. On the subject of medium wave, please remember that we only carry news on stations that have some sort of international output, for instance IDs in English. Therefore, polka pirates are generally not mentioned in this mag. By the way, the same applies for offshore stations, not because these stations wouldn't have an international audience but lots of other mags feature info on them in much greater detail. Of course, exceptions are there to confirm the rule.

Free Radio Company:

World Star Radio
Freetime Radio Int.
R. Sunrise Int.
Radio ARO Int.

,the:06.11.1986

Dear Free Radio Friend!

Wir nun danken für Ihren Empfangsbericht (Wie zu sehen,wir können auch detsch)!

Die Free Radio Company ist ein Zusammenschlusse von 4 Freie Radio stations,die in Europa machen music,ein programm alternatives,with Oldies und moderne Music und Music of all Listeners..

Wir nur haben wenig Geld und wenig Electronic,das wir können machen,ein noch better programme.

Zur Zeit wir haben: 3 micropfones, 3 Plattenspieler, 1 jinglesmachines, 2 cassettenrecorders, 122 Magnetbänders a 6 h and many many more,das aber noch ist nicht genug, wir noch brauchen more electronic's.

Wir wollen machen: 1 free radio magazines und wandet redacteurs
1 Dx-programm for free radio stations,da wir brauchen empfangsberichte von listeners, please von dir!
1 Letter Box programm
1 Top 10
and more,

aber wir nun brauchen dafür ihre Letter and wunsche,please!

Bal@ wir machen ein better programm für die hörer,more commercielle for Wir können verschicken auch auf wunsch Cassetten von programm from the Free Radio Company,das aber haben eine andere Adresse!

Next jahr wir machen ein programm pro Woche von 6h is 360 minuten und dann next jahr ein programm started von 12 h is 720 minutes per week!

Next year wir machen ein programm worldwide for the listeners!

Bitte sie schicken uns Listenersreport von anderen Free Radio stations, das wir können started a Free Radio Listeners club in the programm!

Bitte sie hören unser programm immer und machen KRITIK,damit wir können besser mache unser programm!

Wir nun danken Ihnen für den Report und wir hoffen,dass sie oft unser hörer werden.

the best for you und you
and your live

FRED

Finally in our news section, here's some info on FM-racery in Berlin :
On October 31st, 1986 at 2200 CET a clandestine station called "Der schwarze Kanal" (black channel) was heard announcing that they were transmitting from East German soil. In the broadcast on 99.2MHz the GDR authorities were attacked for their information policy with regards to the Tchernobyl disaster and its consequences. Besides, the station demanded to immediately give up the use of nuclear power for its uncalculatable risks. The 25-minute-long broadcast has gained quite a lot of attention in the West German press, mainly for this seems to have been the first clandestine station from East Germany. Meanwhile, it appears to be certain that the broadcast has come from West Berlin. The Black Channel though has announced that they will be back every last Friday of the month.

And that's actually all the news we have for this time. Before we leave you once again, take note that deadline for issue 88 will be December 4th, 1986, a Thursday as usual. We look forward to hearing from you !

QSL - SURVEY

At last, a supplement to the loglist of November 19th, 1986 :
6295kHz, Radio Diamond, 1038UTC, QRM w/PFBS on nearby channel.
For the very first time, there are pages 7 and 8 in Radiotelex, copies of station info-sheets sent in by the FR Company (no need to say any more about it) and WPRL. Till next time 73s & PFBR, RT

At this point, some general notes about our loglist :
All times mentioned are GMT/UTC; frequencies listed are all kHz, unless otherwise stated.
Abbreviations: E = English; D = Dutch; G = German; F = French; Swe = Swedish (...you wouldn't have guessed that, would you ?).

Quotation of the fortnight

"A listener has written to us that we shouldn't always make such boring announcements..." (recently heard on the F.R.Company)..

NEWS

Radio Atlantis SW (Hunstanton & Wuppertal-addr) intend to return over Christmas 86 on 48 metres. The reason why the station hasn't been heard for quite some time on shortwave is simple, the main tx has blown up! In the meantime, a new rig is under construction and should be put on the air soon. At the moment, Atlantis is regularly heard on Sunday evenings in SE-England with broadcasts on FM 105MHz.

Radio Caledonia Int'l is the tentative name of that Dutch station logged quite often in recent weeks around 7370kHz. The address announced over the air is Postbus 65027, Rotterdam, Holland, the same as used by Radio Aquarius Int'l which lately made a comeback with a VFO-tx. It appears, however, that these are two different transmitters, there seems to be no direct connection between the stations.

Last Sunday, Canzoni Radio has finally made it to the airwaves using their own 30-watt tx on 6282kHz. Apart from Canzoni's own programming, a show of New Zealand's KIWI-Radio was aired. According to station manager Freddy Stone, further transmissions can be expected shortly on either 6282, 6293 or 6320kHz depending on channel availability. You can contact CR at: c/o 3 Rosewarne Cottages, Rosewarne Downs, near Camborne, Cornwall, TR14 OBE, England or c/o Postbus 725, Arnhem, Netherlands.

Energy 103 has replied to letters sent for the recent relays of the station over Radio Ireland Int; it is stated that all letters and reports are welcome, QSLs, unfortunately, are not available at the moment but verification cards shall duly be printed. Address is 144 Upper Leeson Street, Dublin 4, Republic of Ireland.

Free Medway Town Radio (FMTR, PO Box SH9, Sheerness, Kent, ME12 1AQ, England) has celebrated its 1st birthday on November 9th, 1986. The station's second tx is off the air at the moment but it is hoped to resume broadcasts on 6355kHz, in parallel with 6319. Nighttime transmissions on 6319kHz have been stopped on September 10th due to lack of response, these used to go out 2300 - 0100 UTC.

FRS-Holland, c/o Postbus 41, 7700 AA Dedemsvaart, Netherlands, plans to put out a giant Xmas party once again on the 3rd Sunday of December via Delmare. Listeners are asked to send in their dedications and requests in a letter or on tape (good quality). All mail should reach Dedemsvaart before the beginning of December, so hurry up! It appears that nowadays quite a lot of stations do initiate that kind of Christmas shows, it must be pointed out though that FRSH was the first to introduce that idea to shortwave Free Radio back in 1980.

Holiday Radio (Wuppertal-address) tells us that relays of programmes are to be heard over Delmare, Milano and possibly also Radio East Coast Commercial. From January 86 onwards the station intends to play solely 12-inch-singles, programme time may be extended to 90mins then. DJ Mike Jones informs us that the station is not the same as the Radio Brazilia project (a show of Brazilia should have been aired over Milano in October), although Mike is also involved in that station RB is run by entirely different people.

KLA-Radio, c/o Utrecht-address, has dropped a line telling that the station will be back over Xmas this year on a channel somewhere between 6243 and 6525kHz. Who remembers good ole K.L.Alberts?! As it seems, a hell of activity should be there over the festive season again; if your station is to hit the airwaves over Xmas, why not write in and publicise your schedule. Remember, you need some competition.

ANORAKS

P.O. BOX 539
BLACKPOOL FY14RE
England

Radio Mr Sandman, c/o Postbus 21, 7010 AA Gaanderen, Holland, has been received a couple of weeks back with a special broadcast on 6221kHz. It was announced that "Mr Sandman" was the big brother of Radio Tonair who also made an appearance in that broadcast, and tx power was 500 watts (Dutch watts no doubt but they managed to get a good signal in here though). As that was just a test, more broadcasts may be imminent.

Another Dutch broadcaster, more seriously perhaps, Radio Neptune Int'l has sent off replies to listeners' letters of late. Sadly, no detailed QSLs have been issued but as we all know there are more important things in the world. Neptune plans to transmit on a freq within the 6500 - 6800 kHz range some time in the future, so far 6223, 6300, 6305 and 6332kHz have been used. Presently, a 20-watt rig connected to a dipole aerial (24mts) provides good reception in most of Europe. Address: Postbus 185, Heerde, Netherlands.

Radio Orion ("The big O"), 82b Edgewood Road, Rednal, Birmingham, B45 8SG, England, hopes to be back soon on 3465kHz with evening transmissions. Reports are most welcome at the above address.

Surprisingly, Radio Rainbow International, 151 Moneymore, Drogheda, Co. Louth, Eire, didn't make it to the air with their regular line-up of programmes last Sunday but instead tested a new tx in the afternoon on 6240kHz. This has been one of the very few times during the last year that Rainbow missed a scheduled broadcast.

According to Anoraks UK, Radio Skywave International (c/o IRRS, PO Box 1686, Dublin 1, Eire) are possibly going to use their stand-by transmitter on either 6265, 6840 or 6870kHz as well as their normal tx on 6261. Indeed, last Sunday, Skywave were heard on 6870; it seems the range between 6800 and 6900kHz is becoming rather popular these days as shown by the increasing number of stations active there.

Spectrum World Broadcasting have been quiet of late due to a change of operators. Gerry Sinclair has gone back to Canada and the transmitter, studio and other facilities have been taken over by Jay Burkette. He plans to keep the popular format of news and information blended with a selection of the best music around (modest, ed). SWBC say that they plan to introduce special transmissions on the FM bands to be broadcast at times of long distance reception. The mailing address remains BM Broadcasting, London, WC1N 3XX, England while SWBC have had a new QSL printed. / Wavelength 12

Sunrise Radio from Scandinavia (not the one relayed by Delmare!) have abandoned transmissions on 26mts 11400 or 11416kHz as their signal used to skip across Europe most times up to now. However, Sunrise may be back again over Xmas, no frequency is known as yet. c/o Dedemsvaart-maildrop.

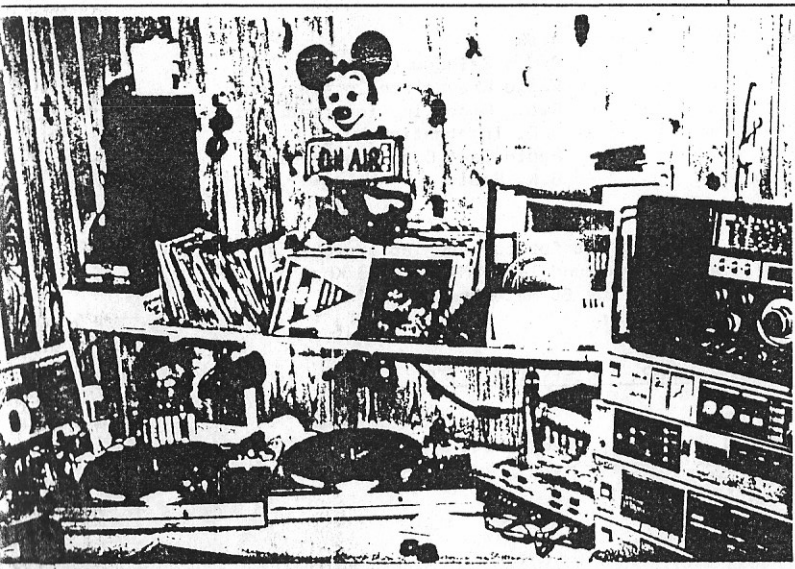

Radio Titanic International, also via Dedemsvaart, have written in to ask us to print the following message from the operators: "RTI did their recent shows on 6293 and 6275kHz via their own equipment, a 17 watt rig with a halfwave dipole antenna. Although some guest DJs were heard during our shows, e.g. Pirate Andy and Dave Scott, there was absolutely no connection to their txs!".

Wonderful Free Radio London (WFRL), PO Box 5, Hunstanton, Norfolk, PE36 5AU, England, plan to make an extra-long broadcast on Boxing Day 86 of maybe 6 hours duration. Additionally, some new voices should appear next year on the station.

Wavelength 12 is out now, 12 pages of A5 format, extensive coverage of offshore and shortwave plus features, highly recommended. For a copy, send 50p or 3IRCs to Hunstanton's famous PO Box 5...

HEERDE

WIGLINS - LIVE -

December 4th, 1986

c/o Duempter Strasse 6, D-4100 Duisburg 12, West Germany.

Well, just three weeks before Christmas by what time an immense amount of Free Radio activity should hit the airwaves if we may believe what we hear.

Being in a holiday mood, we would like to inform you that for several reasons RT 90 will be published one week later than normal. If you have a look at the calendar, you certainly notice that January 1st, 1987 would be the actual deadline for that issue if we stuck to our regular fortnightly pattern.

However, since the post office seems to work particularly slowly after the holidays and thousands of New Year cards are likely to keep the staff busy for some time, we're afraid that most of the contributions will not reach us in time. Therefore (and maybe also for one or two less important personal reasons) RT 90 will be edited on January 8th and thus is to incorporate all the festive season's loggings in just one bumper edition.

Hmmm... talking of issue 90 all the time, we should better get into all the up to date stuff now.

RADIO ORION

STATION INFORMATION SHEET

Address	R. ORION or R.O. (on envelopes) 828 Edgewood Road, Rednal, Birmingham B45 8SG.
Frequency	6240 Khz Monday - Saturday (May change to 6280 Khz) 6266 Khz Sunday
Aerial	Half wave dipole
Transmitter	Four valves - 807 in the final. Approx. 18 watts output
Programmes	Aired : Between 10 - 12 GMT Between 9 - 12 GMT Sundays
Presenters	Mike Wilson Paul Johnson David Jarvis Mike Harris Norman Nelson Andy Scott Frederico (Others to follow)
Orion has relayed	4FWS Radio Rainbow (Germany) Radio Gravestone International Radio Discoline International W.R. International Radio East Coast Commercial U.K. Radio

Keep listening out for our evening broadcasts
starting around 1900 GMT on 3463 Khz
The 86 meter band

KEEP LISTENING TO US

ORION, THE ONE YOU CAN RELY ON

Back in the alphabetical order, Rainbow Radio Germa, c/o Postbus 725, Arnhem, NL are going to be relayed by Dutch pirate Radio Nightrider twice in December. Both on the 14th and 21st a 45-minute-broadcast is to be heard on 1612kHz around 0030 UTC, depending on the TV stations' close downs. Reports for these broadcasts may also be sent to RNL, Postbus 25, 7880 AA Emmercompascuum, NL. Please note that R.Nightrider only ask for one IRC or one 75ct stamp as return postage; reports sent directly to RRG should be covered by 2 IRCs, one US-dollar note or 1.60 DM in mint stamps.

Right-Wing Radio is one of the very few Finnish free radio stations left these days; until recently FM broadcasts have taken place in a Central Finland area on 96MHz. RWR are now planning to move to shortwave and are looking for a suitable tx. Offers (from Scandinavia preferably) please to PO Box 433, D-2980 Norden 1, West Germany. RWR is run by Simon "Eyesman" Heel (disco, AOR & heavy) as well as Tex Willer (rockabilly, 50s rock'n roll & disco).

The establishment of a Scottish Free Radio Network is possibly one of the most important piece of news for some time. A 30-watt-tx operating from a site in the Irish Republic has been installed recently and is since then carrying programmes of several Scottish pirates on a weekly basis. Frequency used at the moment is 6275kHz. The full schedule reads as follows :

1st Sunday : North West European Radio
2nd Sunday : Radio Lynda / WLR (= Woodstock & Lynda Radio !)
3rd Sunday : Radio Omega
4th Sunday : Radio Stella
5th Sunday : North West European Radio
Lynda, Stella and Omega can all be contacted through 32 Victoria Road, Salisbury, Wiltshire, SP1 3NG, England. / DSWCI

Radio Universe, c/o Wuppertal, are planning to celebrate their 1st anniversary on the air with a special transmission on December 7th. Either 6275 or 6297kHz will be used, the exact times and frequency depend on how overcrowded 48mts will be that day. A new tape machine is now in use to improve the station's audio quality (of late it's been more "Qual" than "quality"...). Anyway, happy birthday to the staff of RU from Radiotelex !

Radio XXII, c/o Postbus 19074, 3501 DB Utrecht, NL, will probably be on the air again at the beginning of 1987, not over the Xmas period as previously announced. Listen out for them on 6830kHz.

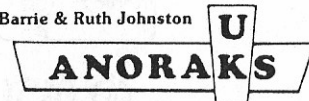

UNIDs. Thanks to the kind help of our contributors we are now able to sort out a couple of mysteries from our logbook :
November-2nd, 1986 6235kHz has been identified as Radio Iris from Amsterdam (NL);
November 16th, 1986 6315kHz were in fact Radio Tutenchamun with another test txmsn over their new rig, the broadcast had to be suspended after 10 minutes due to technical problems.

And that leaves us just to print the well-known reminder : deadline for issue 89 will be December 18th, 1986. We really look forward to hearing from you, in case you're not too busy with your Christmas preparations, that is.

Bye for now & keep on fighting !

73s from R A D I O T E L E X

Barrie & Ruth Johnston

So far for the logs this time. Unfortunately, due to the Weekly Report (Anoraks UK) being late for the first time after quite a long while no UK loggings for last weekend in this issue.

Don't forget that all times mentioned in this mag are UTC (= CET - 1 hour), all freq's listed are kHz, of course.

Now available : new promo stickers (size approximately 11 x 6.5 cm) of Radiotelex. In case you need a few for your radio magazine or station info-sheet, please drop us a line !

... and by the way, if you are still looking for an expensive but useless Xmas gift why not consider making a present of a year's sub to Radiotelex. Or can you think of anything worse ? Let us know !

NEWS

Radio Bavaria have returned to shortwave on November 23rd, 1986 after a break of several months. 6295kHz was used on that day; no address has been announced there.

It is now for sure that Radio Caldonia use the tx of Radio Aquarius International; every 1st Sunday of the month Aquarius are on the air 1000 - 1100 UTC, every 3rd Sunday Caldonia make it to the bands between 0900 and 1200 UTC. A channel on 41mts is used but the frequency varies considerably due to a VFO-rig being in operation ! Caldonia is the name of a former FM station from the North of Rotterdam. The next shortwave transmissions are scheduled for December 21st & 25th. Furthermore, broadcast times shall be extended including txmsns during the week. Aquarius and Caldonia share Postbus 65027, Rotterdam, NL.

Radio Discoline International are going to be relayed by Delmare 6206 around Xmas time this year. Meanwhile, regular relays over Milano and Orion continue. A kind of contest has been launched by the station, every listener who reports on Discoline's relays via RMI on 1301kHz will get a souvenir. RDI, Postfach 1130, 4154 Tönisvorst 1, West Germany is the address.

Radio Earth, PO Box 321, Chicago, Illinois 60666, USA are not heard over Milano 7295 at the moment as the station owes RMI some 500 US-dollars of airtime fees, we are told.

Radio East Coast Commercial (RECC), c/o PO Box 5, Hunstanton, Norfolk, PE36 5AU, England, hope to make a broadcast on Christmas Day 1100 - 1400 UTC. You, the listener, may phone the station during the times of transmission, so take note of the phone number UK 04853 2742.

European Christian Radio have told one of our reporters that at present 70 watts are used for their broadcasts from a site near the Adriatic coastline on 7335kHz. This shall shortly be increased to 1kW power although no date has been mentioned for that. The station's studio is located at Vienna; reports are welcome at EFG, Postfach, 2345 Brunn, Austria.

FRS-Holland, c/o Postbus 41, 7700 AA Deuemsvaart, Netherlands, have written in with some info on their Christmas activities. As mentioned in Rf 87, FRSH are going to present a special line-up of shows on their regular 3rd Sunday broadcast via Delmare December 21st :
0854 UTC Opening (IDs & theme tune)
0902 UTC FRS X-mas Party (1) including letters & dedications
1100 UTC -FRS Goes DX
1145 UTC German service incl oldies & requests
1230 UTC FRS X-mas Party (2)
1500 UTC Close-down.

**FRS-HOLLAND IN STEREO ?
AN EXPERIENCE.**

As per usual, most of the FRSH DJs will be in the studio to make the celebrations, a real happening !

FRS. sales-productions

Moreover, December 25th is to see a repetition of 4 hours of that Christmas special on 6206kHz. In addition, a so-called "Old-New Year's" programme shall go out on December 28th via the IRMS on 6830kHz. The new FRS Goes DX magazine has also been released of late, 16 pages of offshore and shortwave news plus a number of features and info on FRSH. Now in much improved printing quality, try a sample copy for just one IRC.

Holiday Radio intend to transmit with an own tx some time in the future, by then the name Hunsrück Radio shall be used. DJs at the station at the moment are Mike Jones and Jürgen. Address : c/o Postfach 220342, 5600 Wuppertal 22, West Germany.

Radio Limit International, Wuppertal-address, have received some 220 reports so far after 10 months of the station's existence. Their next show will be put out by Milano, some Christmas pop songs will be included in the programme. The recent transmission on 6220 kHz has been quite a success, in fact more letters have arrived for that show compared to a regular broadcast via Delmare. Of course, RLI did not use an own rig then but was relayed by another pirate which shall remain unnamed. Further broadcasts over that anonymous station are lined up for the future.

Radio Orion, c/o 82b Edgewood Road, Rednal, Birmingham, B45 8SG, England, have announced that 3465kHz is to be used during the weekday evenings. Times given for the proposed broadcasts were 2015 - 2115 UTC. Orion have recently moved to 6280kHz for their weekday morning transmissions which replaces 6201kHz due to QRM with Radio Tirana.

Radio Pacman can be contacted at c/o JLV, 2 Avenue du Vieux-Moulin, 62630 Etaples, France. The station is not connected to the Elburg-based Radio Delta, we're told.

Radio Privat(e), Lurmstrasse 26, 6500 Mainz, West Germany, have hit the airwaves twice on November 23rd, 1986 using the tx facilities of Delmare 6206 as well as a unid relay station on 6275kHz. RP are scheduled to be heard every 2nd Sunday of the month over Delmare, starting probably around 1200 UTC.

Riverside Radio Int'l have announced that they are going to relay the Canadian station Maple Leaf Radio some time in December.

Right-Wing-Radio, c/o Postfach 433, 2980 Norden 1, East Germany, a Finnish free radio project, are going to start with regular shortwave broadcasts via Delmare every 2nd Sunday of the month, probably 1300 - 1500 UTC. The first show should be aired on January 11th, 1987.
RWR - The World's Northeast Free Radio Station.

Radio Titanic Int'l, Postbus 41, 7700 AA Dedemsvaart, Netherlands, hope to be back again over the Xmas season on 48 metres. In 1987, RTI will be on the air occasionally only, we are informed. All reports received for their birthday activities should get a reply by the end of this year if enough return postage had been enclosed naturally.

Radio Tonair, Postbus 21, 7010 AA Gaanderen, NL, plan to transmit on either Christmas Day or Boxing Day including relays of Radios Mr Sandman and Torenvalk plus Orang Utan. The station claims that 500 watts are actually used, moreover, power shall duly be increased.

Radio Waves Int'l are currently transmitting according to the following schedule : until 1000 UTC 7374kHz is used, by then RWR move to 7840 kHz where they stay up to closedown at 1200 UTC. Address: BP 130, 92504 Rueil Cedex, France.

Westside Radio, 310 Collins Avenue West, Whitehall, Dublin 9, Eire, had announced to test on 11463kHz December 14th at 0730 UTC. / AUK

As a f/up on our report concerning the Berlin clandestine station "Schwarzer Kanal" (Black Channel), newspaper articles of December 2nd state that the post office and police have tried to locate the station, without success. It has been said though that these illegal broadcasts have come from the Neukölln area, a district in the Western part of the city.

To end this issue in an extremely commercial fashion, some ADVERTS :

+++ The following items are all for sale, no prices are given, so make a bid and help yourself to a fantastic bargain...
Telefunken magnetophon 230 tape (reel-to-reel) machine
IIF Stereo 3500 receiver covering FM, AM and shortwave (5.8 - 6.3 plus 6.8 - 18.2 MHz)
Monacor MPX 2000 5-channel mixer
Kaiser KF 9012D CB home transceiver (12 channels AM)
Stabo M12 CB mobile transceiver (12 channels AM)
auxiliary CB equipment such as aerials etc. (ask for details).
If interested, contact Box NRG, c/o RT-address.

+++ For sale : C-90 cassette tape containing recordings of Caroline's (offshore) "Buster special" plus "Overdrive" featuring Tom Anderson. Good quality, by all means. Price is DM 7,- preferably in mint German stamps, from Box G, c/o RT.

Laser fans, please watch out for the next edition when we offer some unique recordings of Laser 576 !

Now then, let's get a bit reflective in the end... who really knows what will be typed on this occasion in one year's time ?!
Anyway, may we just wish you all the best, lots of listening pleasure over Xmas and enter the New Year in a good way !

That's all from RT in 1986, bye !

NEWS

Radio Discoline Int'l, c/o PO Box 1130, 4154 Tönisvorst 1, FRG tell us that all reports received for their Xmas show via Delmare 6206 (c/f RT 88) will be verified by a special QSL-card.

Fun Music Radio conducted their first test transmission on December 6th, 1986 using 6260kHz. Mostly, chart sounds were noted along with a London address, possibly a BCM Box but this isn't sure.

Gamma Radio, Postbus 81, 3450 AB Vleuten, NL, say that they're going to test on high frequencies such as 11400 or 21810kHz. Probably in January next year, Gamma plan to commence RITV (425-50) programmes on 21810kHz. There is also a chance to hear the station on 6284kHz towards the end of 86 if the tx problems were sorted out.

Holiday Radio, c/o Postfach 220342, 5600 Wuppertal 22, West Germany, have told us that their next broadcasts will go out on December 24th 1100-1200 UTC as well as on December 26th 1200 - 1400 UTC, all over Delmare 6206.

Radio Ireland Int'l, 10 North Richmond Street, Dublin 1, Eire, stated that they were using new amplifiers, and wanted reports on the quality of their signal to the above address.

KIWI-Radio, PO Box 1437, Hastings, New Zealand are said to be off the air temporarily as their complete studio equipment has been stolen. The burglars even destroyed the tx on that occasion. Fortunately, the insurance company will pay for the loss before Xmas, so KIWI should be back before the New Year. Upon their return, the station shall also relay a programme produced by West German Radio Rutenchamun (Wuppertal-address) as part of their recent relay exchange (see logs).

Radio Marabu Int'l (Wuppertal & Utrecht) are to have some additional appearances on shortwave over the Xmas period courtesy of several relay stations including the IRRS, Atlantis SW and Delmare a.o. Their next regular transmission on 6206kHz January 11th will contain a 30-minute-Free Radio Spot on Riverside Radio. A new English language info-booklet has been issued, available for sufficient return postage.

Radio Pamela, c/o 3 Rosewarne Cottages, Rosewarne Downs, near Camborne, Cornwall, TR14 0BE, England, may be off the air for the next few weeks due to moving the medium wave studio and tx. However, they will try and put out something on 6815kHz from a temporary site meanwhile, reports Anoraks UK. Power, by the way, used on that channel is said to be just 8 watts!

P.S.: If you're looking for a New Year resolution that will amaze all your friends and family... what about learning Pamela's address by heart ???

Radio Rainbow Int'l, 151 Moneymore, Drogheda, Co. Louth, Eire, are continuing their weekly broadcast schedule on 6240kHz despite a few Sundays of absence from shortwave lately. This may have been thanks to technical problems (reports say a new tx is now in use) or station operator Heady Eddie's involvement in Boyneside Radio. According to Anoraks UK, Rainbow were heard on FM 96.5MHz in the Co. Louth area.

+++ Let's take a break now and insert one of your favourite columns, the printing errors: "Mike Jones" should have read "Marc Jones", and "frop us a line" means "drop us a line", of course.
Well, if you notice any errors or mistakes, feel free to write in!
